Swigg, 1994 The poetry of Charles Tomlinson is distinguished by its respect for the world as objective fact as set apart from human mythmaking symbolizing and egotistic projection In Charles Tomlinson and the Objective Tradition Richard Swigg examines the amazingly versatile speech and relationship that Tomlinson has brought to the concreteness of nature and city from the early poems of the 1940s up to the late 1980s by assessing the achievement within an Anglo American tradition of factuality from which Tomlinson has drawn strength and which his work now illuminates Blake's gleaming particularities Constable's science of painting Ruskin's visual energy Emerson's and Wordsworth's delight in humble solidities Whitman's celebration of American facts all belong to the lineage that as Tomlinson's poetry reveals takes on new expression in the modernism of Wallace Stevens and Marianne Moore This book traces Tomlinson's debt to Stevens and Moore in his poetry of the 1950s but gives special attention to the larger influence and widening of range that the art of William Carlos Williams exerted on the poetry of the 1960s and after Williams's sense of the local as a way into the universal touches a theme that has special significance for Tomlinson's Englishness and internationalism particularly in the way that this double quality gives us new insight into the poetry of other Englishmen Ivor Gurney and D H Lawrence in relation to Whitman Edward Thomas in relation to Robert Frost who also sought New World precisions to speak their nativeness The volume's close attention to the vocal grain and texture of many individual poems is especially marked in a chapter devoted to Tomlinson's politico historical poems on Danton Charlotte Corday and Machiavelli The poet not only provides a perspective on T S Eliot and Octavio Paz but in a poem about Trotsky's assassination draws on the singular American quality of Orson Welles's Citizen Kane Swigg assesses Tomlinson's stature in post war British poetry by contrasting his work with that of Philip Larkin and W H Auden and by demonstrating how much he shares with David Jones and Basil Bunting The latter two English internationalists of *The Anathemata* and *Briggflatts* have like Tomlinson won their way home to a Britain of spiritual density and concreteness

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *The Poetry of Thom Gunn* Stefania Michelucci, 2008-12-24 Thom Gunn served as a mouthpiece for his time illustrating the social cultural and historical transformations that have characterized western civilization from World War II until today Starting with theoretical premises drawn from philosophy anthropology and sociology this work examines Thom Gunn's entire poetic career In Gunn's early poetry the author argues the predominant theme is the desire for freedom from the painful prison of the intellect and from the masks that the individual feels compelled to wear even in his sexual relationships In Gunn's later poetry the author notes a gradual opening to human relationships and to Nature which is also Gunn's vindication and reevaluation of his own nature and the liberation of his long repressed and hidden homosexuality **Poetic Closure**

Barbara Herrnstein Smith, 1968 Explores the question How do poems end This work examines numerous individual poems and examples of common poetic forms in order to reveal the relationship between closure and the overall structure and integrity of a poem **The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950** George

Watson, I. R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries Elizabeth Jennings Dana Greene, 2018-09-04 Elizabeth Jennings was one of the most popular prolific and widely anthologized lyric poets in the second half of the twentieth century This first biography based on extensive archival research and interviews with Jennings s contemporaries integrates her life and work and explores the inward war the poet experienced as a result of her gender religion and mental fragility Originally associated with the Movement Jennings was sui generis believing poetry was communication and communion She wrote of nature friendship childhood religion love and art endearing her to a wide audience Yet lifelong depression unbearable loneliness unrelenting fears poverty and physical illness plagued her These were exacerbated by her gender in a male dominated literary world and an inherited Catholic worldview which initially inculcated guilt and shame However a tenacious drive to be a poet made her the most unconditionally loved writer of her generation Although her claim was that the poem is not the poet her life is tracked in her voluminous published and unpublished poetry and prose The themes of mental illness the importance of place the problems associated with being an unmarried woman artist her relationship with literary mentors and younger poets her non feminist feminism and her marginality and sympathy for the outcast are all explored It was poetry which saved her it helped her push back darkness and discover order in the midst of chaos Poetry was her *raison d'être* It was her life *World as Event* Brian John, 1989 Since the death of Dylan Thomas in 1953 British poetry has been influenced largely by two contrasting poets Philip Larkin and Ted Hughes each attracting partisan admirers and imitators and each by this time granted deserved prominence in the mainstream of English poetic tradition **Many Histories Deep** Roger Bowen, 1995 Fraser and the Greek exiles George Seferis and Elie Papadimitriou **John Betjeman** Dennis Brown, 1999 Dennis Brown s book assesses Sir John Betjeman s contribution to poetry in the light of the way that his key themes have specific relevance to postmodern and environmental concerns emphasising its ironic self reflexivity its rendering of Englishness and a soft masculinity and its ecumenical Christian tolerance **Nine Contemporary Poets** P.R. King, 2021-12-24 First Published in 1979 This volume includes simple and systematic introduction to the more important post war English poets Including reviews of the poetry of Larkin Tomlinson Gunn Hughes Plath Heaney and more This work will appeal to A level students undergraduates members of adult education classes and general readers enjoying modern literature Yeats as Precursor S. Matthews, 2000-01-27 As both a late Romantic and a modern W B Yeats has proved to be perhaps the most influential poet of the early twentieth century In this

original study Steven Matthews traces through close readings of significant poems the flow of Yeatsian influence across time and cultural space By engaging with the formalist criticism of Harold Bloom and Paul de Man in their dialogues with Jacques Derrida he also considers Yeats's significance as the founding presence within the major poetry criticism of the century
