Reality Wynand De Beer, 2019-09-24 What is reality Most people in the modern world are ignorant of metaphysical realities not to mention the prevalence of semantic confusion and therefore Wynand de Beer aims to counter this ignorance and confusion He employs numerous insights from classical Greek philosophy and traditional Christian theology in order to discuss the various levels of reality ranging from the highest the divine to the lowest the material The author then deals with a range of philosophical and

theological themes in the light of the preceding discussion These include well being and love time and eternity good and evil truth and knowledge and the survival of the soul beyond bodily death which is the only kind of immortality that human beings may attain A lengthy chapter also deals with the manifestation of higher levels of consciousness in religion mathematics and music In the later chapters of the book the author subjects salient aspects of the Western sociocultural phenomenon known as political correctness to critical scrutiny In the process these ideologically driven and media promoted isms are contrasted with both Hellenic and Christian thought and the penetrating writings of traditionalist and or anti modernist thinkers from different parts of the world

A Search for Reality Leon Combs,2007-11 Imagine life when God s Church has lost acceptance and the government only allows a new church structure that rejects the concept of a Biblical God The purpose of the new churches is to help people attain peace in their lives A world dictator has emerged who achieved peace by suppressing the former concepts of religion so that religious conflicts no longer exist The world government uses virtual reality modules to mold the minds of citizens to accept this new structure and all known Christians are isolated The main character is a scientist who achieves all that the world can offer but who still thinks something is missing He and his friends initiate a search for real reality As the story unfolds choices must be made between the manufactured peace of this worldly existence and the dangers of declaring themselves Christians Dr Combs earned his Ph D in Chemical Physics from LSU and then taught chemistry and physics for 40 years He is Professor and Head Emeritus at Mississippi State University and Professor and Chair Emeritus at Kennesaw State University He has taught Sunday School classes for about 30 years in three different denominations He currently is a member of a reformed Presbyterian church He developed a web site <http://LivingTheology.com> which carries many of his Christian writings This book began about 20 years ago as he observed how the church was losing its identity as God s Church and people attending such local churches seemed mainly interested in socializing and hearing sermons designed to make them feel better He also observed how people were treating sports as religions After retiring in July 2006 from KSU he determined to finish this book since many of the futuristic aspects of the book are already appearing

The Rigged Race of Life Mark Romel,2018-03-07 It takes a fool to participate in a race which he is guaranteed to lose The race of life is designed to ensure you fail unless you belong to the privileged elite This is a race in which it is not the fastest runners who win but those who thanks to inheritance are brazenly placed right in front of the finishing line They could fall over and still win It takes a fool to support this mad game and that s exactly what the system produces fools in their legions They are the foot soldiers of the Dumbocracy the Idiocracy the Moronarchy They are all slavish followers of Freedumb The 1% have done an astounding job of controlling the 99% and making the masses serve them at all times The 99% dream of being the 1% That s the American Dream Those who dream of being part of the rich elite will never revolt against the rich elite even when that s the only way to free themselves Herbert Marcuse wrote At the highest stage of capitalism the most necessary revolution appears as the most unlikely one

Race, Reality, and Realpolitik

Jeffrey Sommers, 2015-11-11 The year 2015 marked the centennial of the 1915 United States occupation of Haiti and Haiti's resistance to that signal event in its history. This study surveys the issues of economics, race, and realpolitik embedded in the political economy of U.S. interactions with Haiti that resulted in occupation. It then interrogates what constitutes the state as it pertains to foreign policy along with an inspection of who benefits from empire. This approach eschews tired dichotomies of whether or not the United States as a whole materially benefited from empire to instead simply look at who individually gained and what were the capacities of these beneficiaries to craft policy. Next, it delivers insights derived from a forensic analysis of Woodrow Wilson's perception of race and his decision to intervene in Haiti. Attitudes enabling United States military leaders to implement a policy of occupation are provided through a study of Admiral William Caperton's role in the intervention. The focus then telescopes out to inspect the role played by the press, especially as booster for commercial opportunities. In short, the project answers the questions of why, who, and how American empire was undertaken through the case study of Haiti and its occupation in 1915.
