The Law of the Australian Constitution Donald Kerr, 1925 **Deference to the Administration in Judicial Review** Guobin Zhu, 2019-11-23 This book investigates judicial deference to the administration in judicial review a concept and legal practice that can be found to a greater or lesser degree in every constitutional system In each system deference functions differently because the positioning of the judiciary with regard to the separation of powers the role of the courts as a mechanism of checks and balances and the scope of judicial review differ In addition the way deference works within the constitutional system itself is complex multi faceted and often covert Although judicial deference to the administration is a topical theme in comparative administrative law a general examination of national systems is still lacking As such a theoretical and empirical review is called for Accordingly this book presents national reports from 15 jurisdictions ranging from Argentina Canada and the US to the EU Constituting the outcome of the 20th General Congress of the International Academy of Comparative Law held in Fukuoka Japan in July 2018 it offers a valuable and unique resource for the study of comparative administrative law *Power Beyond Constitutions* Miloš Brunclík, Michal Kubát, Attila Vincze, Miluše Kindlová, Marek Antoš, Filip Horák, Lukáš Hájek, 2023-07-12 This research monograph examines presidential constitutional conventions and the role they play in the political systems of four Central European countries the Czech Republic Slovakia Hungary and Poland As primarily unwritten rules of constitutional practice constitutional conventions represent political arrangements and as such are political in origin Not only this constitutional conventions in general and presidential constitutional conventions in particular have significant political implications They shape both the everyday operation and character of regimes Central Europe represents a particularly useful example on which this role of constitutional conventions

constitutional amendment to empower Indigenous peoples with a fairer say in laws and policies made about them and their rights is both constitutionally congruent and politically achievable A First Nations voice is deeply in keeping with the culture design and philosophy of Australia's federal Constitution as well as the long history of Indigenous advocacy for greater empowerment and self determination in their affairs Morris explores the historical political theoretical and international contexts underpinning the contemporary debate before delving into the constitutional detail to craft a compelling case for change

Calendar University of Sydney, 1908 **Australia's American Constitution and the Dismissal** David Long, 2021-04-28 David Long traces the cause of the 1975 constitutional crisis to the influence of English legal positivism a theory which isolates the meaning from the political scheme the text was framed to support He shows the fundamental premise of a Constitution framed in Convention ratified by the people that cannot be altered without their consent the consent of the governed Legal positivism was adopted by the High Court in 1920 when it abolished the federal scheme and therewith the sovereign States The responsible judge had opposed federalism at the 1897 Convention Long examines two juristic opinions that excused the Governor General's 1975 unprecedented dismissal of a government with the confidence of the House of Representatives He identifies their reliance on legal positivist constitutional interpretations that are expressly rejected by the Founders Long provides a theoretical defense of the Founders original understanding as the object of constitutional construction

Law and Religion, An Overview Silvio Ferrari, 2017-07-05 The focus of this volume is on the historical and geographical elements of law and religion The first part delineates and analyzes the relation between church and state from the Gregorian Revolution to the human rights era and gives a sense of the evolution of the church and state relationship whilst the second part explores law and religion issues around the world The volume redresses the tendency towards a western centric approach in the discipline by including essays from regional experts which present local approaches to law and religion in Asia Africa and South America The collection is unique in that it brings together wide ranging case studies and out of print papers and is an important resource for established and new scholars in the field
