Political Science and International Relations Drew Paul, 2018-05-12 Many important questions in the study of international relations are connected with the theory and practice of sovereign statehood which as indicated is the central historical institution of world politics But there are other important

issues as well. That has led to ongoing debates about the proper scope of international relations. At one extreme the scholarly focus is exclusively on states and interstate relations but at other extreme international relations almost everything that has to do with human relations across the world. It is important to study these different perspectives if we hope to have balanced and rounded knowledge of International relations. This book has been designed to unravel the complexities of political science and international relations in a way that allows student a clear idea of how the theories work and myths that are associated with them.

It develops the wider themes of political thought and the relations between thinkers over time.

The Chinese Internet Yuqi Na, 2023-11-03 This book explores China's digital discourse and how the Internet influences social and ideological changes to the country's political economy within China's historical context and through a variety of social and political actors. Analysing discourses as diverse as policy papers, addresses from the Xi Li Administration and speeches from CEOs of the dominant Internet companies in China as well as those of Chinese Internet Users, this book illuminates the dynamics, complexity and structural contradictions in China's current network technology enabled developmental path through the lens of ideology and discourse. The book proposes a multi-dimensional model to understand Marxist ideologies under capitalism, emphasizing the relevance of alienation, commodity fetishism and reification in contemporary discussions of ideology and discourse. This insightful study offers fresh insights into Chinese digital discourse and will be of interest to upper level students and scholars of communication studies, digital media sociology, political science and Internet and technology studies.
