Women Healers Susan H. Brandt, 2022-04-15 In her eighteenth century medical recipe manuscript the Philadelphia healer Elizabeth Coates Paschall asserted her ingenuity and authority with the bold strokes of her pen Paschall developed an extensive healing practice consulted medical texts and conducted experiments based on personal observations As British North America s premier city of medicine and science Philadelphia offered Paschall a nurturing environment enriched by diverse healing cultures and the Quaker values of gender equality and women s education She participated in transatlantic medical and scientific networks with her friend Benjamin Franklin Paschall was not unique however Women Healers recovers numerous women of European African and Native American descent who provided the bulk of health care in the greater Philadelphia area for centuries Although the history of women practitioners often begins with the 1850 founding of Philadelphia s Female Medical College the first women s medical school in the United States these students merely continued the legacies of women like Paschall Remarkably though the lives and work of early American female practitioners have gone largely unexplored While some sources depict these women as amateurs whose influence declined Susan Brandt documents women s authoritative medical work that continued well into the nineteenth century Spanning a century and a half Women Healers traces the transmission of European women s medical remedies to the Delaware Valley where they blended with African and Indigenous women s practices forming hybrid healing cultures Drawing on extensive archival research Brandt demonstrates that women healers were not inflexible traditional practitioners destined to fall victim to the onward march of Enlightenment science capitalism and medical professionalization Instead women of various classes and ethnicities found new sources of healing authority engaged in the consumer medical marketplace and resisted physicians attempts to marginalize them Brandt reveals that women healers participated actively in medical and scientific knowledge production and the transition to market capitalism

The Healer-Prophet in Afro-Christian Churches Gerhardus C. Oosthuizen, 2016-05-18 Apart from the mainline Pentecostal and Zionist churches there are different types of African Independent Indigenous Churches AIC The greater part of the more than four thousand denominations and eight million adherents came into the AIC during the past three decades mainly from the traditional African religious background The important role of the diviner in the traditional society has been replaced by the prophet in the AIC the prophet understands the worldview of his her people especially the cultural diseases In some churches the office

of prophet cum diviner is represented by one person The AIC movement is the most dynamic church movement in many parts of Africa especially Southern Africa The consistent growth of these churches can largely be accounted for by the healing procedures they use which are highlighted in this study Dr Oosthuizen approaches healing from various angles as sickness is not only determined by physical and psychological factors but also by disturbed human relationships and socio political and economic tensions
