401 - Managing the Care of People with Long-Term Conditions Great Britain: Parliament: House of Commons: Health Committee,2014-07-03 15 million NHS patients in England with long term conditions such as diabetes arthritis and asthma account for 70% of the annual expenditure of the NHS in England One projection estimating that the bill for treatment of long term conditions will require the NHS to find 4 billion more each year by 2016 Increasingly patients do not have a single long term condition but live with two or more conditions complicating treatment and adding to its cost The Committee strongly supports the development of individual care planning for people with long term conditions based on the principles successfully demonstrated in the NHS House of Care programme Care planning approaches will involve GPs community health services and specialists sitting down with the patient to draw up a personalised plan for the care required which includes the support needed to help the patient manage his or her own condition The challenge though of introducing personalised care planning for 15 million people is substantial The Committee looked at the prevailing view that services to treat long term conditions should be moved out of hospitals and into primary and community care To provide effective care for these conditions services have to be maintained across all settings from support in the home through to acute specialist care and many conditions will continue to require specialist services delivered in hospital Effective management of long term conditions also requires collaboration with other government providers such as housing and transport services
