**Economic Policy Reform in Mexico** Leopoldo Solís, 2013-09-11 Economic Policy Reform in Mexico A Case Study for Developing Countries is a five chapter text about political economy that tries to assess the economic developments in Mexico especially the attempt at economic reform in the early 1970s The first chapter examines the period of Stabilizing Development to provide a framework necessary for judging the environment in which the attempts at economic reform were undertaken This chapter is a piece of applied economics that tries to assess the too frequent attacks against that phase of economic policy The following three chapters discuss the economic policy

objectives of Echeverria's administration the attempt at tax reform and the change in the structure and practices of public spending The final chapter evaluates the experience and draws some inferences about the nature of decision making in economic policy and the constraints faced by a government that wants to use economic policy as an instrument for the promotion of social welfare This book will prove useful to economists historians and researchers *Progress in Rural Geography (Routledge Revivals)* Michael Pacione, 2014-06-03 This wide ranging volume first published in 1983 reflects the increasing scope of the field of rural geography in the second half of the twentieth century Although traditional areas of study such as agriculture and the land use patterns of the countryside remained important scholars also began to consider rural transport employment housing and policy as well as to develop new theories and methodologies for application to study The chapters included here addressed the need for a review of the changes that had taken place within the field of rural geography and as such provide an essential background to students with an interest in rural demography planning and agriculture Colossus Challenged H. Michael Erisman, 2019-03-04 In recent years the powerful and long standing influence of the United States in the Caribbean and Central America has been challenged directly by Cuba Mexico and Venezuela and many think indirectly by the USSR This struggle for dominance which has altered and still is significantly changing the power configuration in the Caribbean Basin is examined in detail in *Colossus Challenged* The book contains seven chapters by prominent area specialists Five of the chapters focus on the Caribbean policies of the major contenders for power analyzing the evolution of each country's policies the main variables affecting its definition of interests and its decision making and its prospects for exerting regional influence in the foreseeable future The other two chapters look at the rivalry for Caribbean influence from the perspectives of eastern Caribbean and Central American governments Education in Latin America Colin Brock, Hugh Lawlor, 2018-05-08 Originally published in 1985 Latin America is a region where widespread economic social and political changes are taking place Some countries such as Brazil are becoming new industrial giants whereas others with good prospects are performing poorly in the economic sphere In politics countries such as Cuba are leading world revolutionary powers whilst in others right wing military regimes prevail Political revolutions occur frequently All this change and instability is closely bound up with education Education systems and courses are greatly affected by social political and economic changes and at the same time education is used to steer changes in particular directions This book surveys the current state of education in Latin America It reviews the nature of education systems and the content of courses and discusses a range of key themes in particular those concerned with the connections between education and political economic and social change There is no attempt in the book to provide a blanket coverage of educational issues and problems in Latin America but rather to concentrate on a description and critical analysis of formal educational provisions in some countries of the region **Consumption and Public Policy in Peru** Veronica del Carmen Ruiz de Castilla, 1996

**No Other Way Out** Jeff Goodwin, 2001-06-04 No Other Way Out provides a powerful explanation for the emergence of

popular revolutionary movements and the occurrence of actual revolutions during the Cold War era This sweeping study ranges from Southeast Asia in the 1940s and 1950s to Central America in the 1970s and 1980s and Eastern Europe in 1989 Following in the state centered tradition of Theda Skocpol's *States and Social Revolutions* and Jack Goldstone's *Revolutions and Rebellion in the Early Modern World* Goodwin demonstrates how the actions of specific types of authoritarian regimes unwittingly channeled popular resistance into radical and often violent directions Revolution became the only way out to use Trotsky's formulation for the opponents of these intransigent regimes By comparing the historical trajectories of more than a dozen countries Goodwin also shows how revolutionaries were sometimes able to create and not simply exploit opportunities for seizing state power

**Honduras** James A. Morris, 2019-03-01 Since the retirement of longtime dictator Tiburcio Carías Andino 1932-1949 the search for institutional stability in Honduras has led to both democratically elected governments and the imposed discipline of military rule Social and economic change has contributed to the growth of middle class urban groups strongly organized labor unions and a vigorous peasant movement The Honduran armed forces established in modern form only after World War II filled the vacuum of political power that developed as the Liberal and National political parties failed to address the problems created by change and national development but the authoritarianism of military rule has been countered by historical patterns of caudillo politics Despite the revolutionary turmoil that surrounds the country Hondurans have successfully conducted national elections and installed a freely elected civilian government after more than ten years of military rule It is within this mix of traditional and praetorian governing modes that Hondurans have fashioned a style of politics conducive to compromise which accounts for the country's relative tranquillity today In this first comprehensive study of contemporary Honduras its land people economy and politics to be published in English Dr Morris also outlines the historical context that has shaped the society of this now geopolitically important nation and conditioned its political dynamics over the past three decades His analysis illuminates the characteristics that distinguish Honduras from its Central American neighbors and that may dictate a unique course for its political evolution

**Peasants And Power** Joan Sokolovsky, 2019-05-28 Focusing on events in Hungary and Poland from 1948 to 1962 Dr Sokolovsky shows why collectivization can best be understood as an element in state building for the new regimes of Eastern Europe For these countries policy options were constrained by dependence upon the Soviet Union and the economic demands of a newly industrializing society
