**A Study of Labor Mobility in China** Sun Wenkai, 2021-12-30 The title investigates rural labor mobility in China since 2003 an important phenomenon in the process of Chinese economic transition influential in economic growth at the macro level and individual wellbeing at the micro level Based on empirical analysis the study identifies and evaluates the characteristics driving forces and impact of the migration and mobility of the rural labor force The following factors are considered to impact rural workers mobility decisions and are thoroughly discussed in each chapter 1 convergence in the level of regional income 2 industrial structure and the age structure of the workforce 3 the household registration system 4 the income gap 5 the issue of children that are left behind 6 the health status of rural migrant workers and 7 their social networks Drawing on new research methods the final chapter reassesses the impact of rural parents migration to the city and the overall wellbeing of their children left behind at home challenging the well accepted view that there is a negative correlation between the two The book will appeal to scholars and students interested in labor economics Chinese economy sociology demography migrant population and especially labor mobility in China Economic Policy of the People's Republic of China Barbara Darimont, 2023-01-01 This book deals with the current economic policy of the People's Republic of China In addition to a brief overview of economic history since its founding and discussions of economic models an overview of both the forms of business and the Chinese labor market is provided The book pays particular attention to the development of China's e-commerce sector Equally significant are China's environmental issues against the backdrop of the climate crisis Without innovations for example in energy production and waste management the Chinese economy will hardly be able to continue growing Therefore one focus of the book is on economic policy in the environmental sector Finally foreign policy including the Silk Road Initiative is examined The aim of this book is to highlight the above developments It is aimed at laypersons involved in the business of China as well as first year students who want an overview of economic policy institutions and current developments **Rural Labor Migration, Discrimination, and the New Dual Labor Market in China** Guifu Chen, Shigeyuki Hamori, 2013-11-29 This book studies some important issues in China's labor market such as rural labor migration employment and wage discrimination the new dual labor market and economic returns on schooling using the newer and representative data and advanced estimation models This approach has yielded many interesting results including a solution to the dilemma of two ongoing crises since 2004 the rural labor surplus and severe shortage of migrant labor While male workers generally received less favorable treatment and consequently enjoyed a lower average employment probability than female workers in 1996 they also received preferential treatment over female workers who otherwise had identical worker characteristics in 2005 We provide new estimates for male female hourly wage differentials in urban China and our results indicate that the hourly wage differentials and the unexplained part of the hourly wage differentials are smaller than the differentials obtained by ignoring the sample selection bias We study China's new dual labor market which

is shifting from a rural migration versus urban workers setup to informal workers versus formal workers setup and present some interesting results Our study is the first to adopt the IV methodology and the Heckman 1979 two step procedure simultaneously for the estimation of economic returns on schooling in China Work and Organizations in China after Thirty Years of Transition Lisa Keister,2009-09-17 Thirty years of economic change have fundamentally altered the nature of organizations and work in China This volume brings together the research by many of the top scholars studying these issues and provides a glimpse into the state of thinking on organizations and work at the start of the fourth decade of transition

unprecedented economic inequality During this period China's educational system was restructured to support economic development with educational reforms occurring at a startling pace Today the educational system has diversified in structure finance and content it has become more market oriented and it is serving an increasingly diverse student population These changes carry significant consequences for China's social mobility and inequality and future economic prospects In Education and Reform in China leading scholars in the fields of education sociology demography and economics investigate the evolution of educational access and attainment educational quality and the economic consequences of being educated Education and Reform in China shows that economic advancement is increasingly tied to education in China even as educational services are increasingly marketized The volume investigates the varying impact of change for different social ethnic economic and geographic groups Offering interdisciplinary views on the changing role of education in Chinese society and on China's educational achievements and policy challenges this book will be an important resource for those interested in education public policy and development issues in China
