Kimble, 2003-09-25 Soil Degradation in the United States Extent Severity and Trends examines the magnitude and severity of soil degradation by different processes in the U S including water erosion wind erosion C depletion soil compaction salt build up and soil contamination In addition it addresses policy issues with regard to economic and environmental Rural Land-Use Planning in Developed Nations (Routledge Revivals) Paul Cloke, 2013-10-18 This edited collection first published in 1989 provides a detailed analysis of rural land use policies on a country specific basis Case studies include analyses of planning and legislation in Britain The Netherlands Japan the U S A and Australia Alongside a comprehensive overview of the concept and application of rural land use from Paul Cloke environment issues resource management and the role of central governments are topics under discussion throughout At an international level this title will of particular interest to students of rural geography and environmental planning **Forest Conversion, Soil Degradation, Farmers' Perception Nexus** Mekuria Argaw Denboba, 2005 **Land Degradation and Society** Piers Blaikie, Harold Brookfield, 2015-07-30 Why does land management so often fail to prevent soil erosion deforestation salination and flooding How serious are these problems and

for whom This book first published in 1987 sets out to answer these questions which are still some of the most crucial issues in development today using an approach called regional political ecology This approach acknowledges that the reason why land management can fail are extremely varied and must include a thorough understanding of the changing natural resource base itself the human response to this and broader changes in society of which land managers are a part Land Degradation and Society is essential reading for all students of geography agriculture social sciences development studies and related subjects Climate and Land Degradation Mannava VK Sivakumar,Ndegwa Ndiang'ui,2007-10-11 In many parts of the world climatic variations are recognized as one of the major factors contributing to land degradation impacting on agricultural systems performance and management To accurately assess sustainable land management practices the climate resources and the risk of climate related or induced natural disasters in a region must be known Only when climate resources are paired with management or development practices can the land degradation potential be assessed and appropriate mitigation technologies be developed This book is based on an International Workshop held in Arusha Tanzania and should be of interest to all organizations and agencies interested in sustainable land management to arrest land degradation *A Future for Regional Australia* I. W. Gray,Geoffrey Lawrence,2001-07-31 This book interprets the predicament faced by Australia s regional people from their own perspective and proposes a means by which they can act together to find a secure future under globalisation It argues that neoliberalism in combination with its real world effects in economic policy are driving regional Australia further into social environmental and economic decay The book will be of great interest to all concerned about the future of regional Australia and will make a lively and relevant text for students studying the social sciences in the countryside or in the major cities **Handbook of Rural Studies** Paul Cloke,Terry Marsden,Patrick Mooney,2006-01-26 This is a unique interpretation of rural issues that will become essential reference for students scholars politicians developers and rural activists Imre Kovach President European Society for Rural Sociology Research director Institute for Political Sciences Budapest **The Rural** Richard Munton,2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural

turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts
