The Middle Eastern Village Richard Lawless, 2023-05-31 Rapid and uneven change to the fabric of rural life is widespread in modern Middle Eastern countries Modernisation usually in the Western model has often brought major improvements in agricultural technology education and public health but has also had the effect of weakening the traditional rural economy of many villages and encouraging their growing dependence on external sources of income most notably oil remittances This collection of research on the Middle Eastern village looks at the impact on rural life and environment of such factors as the mass exodus of labour to urban centres emigration immigration environmental change and the changing role of women in rural communities particularly the wives of migrant workers who have to fill a new role in the family structure State sponsored agrarian policies have weakened the power of traditional landed interests and together with labour migration have provoked new tension and inequalities in rural society The book makes clear that the pattern of change has been highly uneven and has served to heterogenise the countryside As the oil states enter a period of recession and the likelihood of substantial return migration increases rural communities will need to make further major adjustments and the book examines the tensions this new development is likely to produce First published in 1987

The Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and

interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life City, Space and Politics in the Global South Bikramaditya K.
