Regional Leadership in Post-Soviet Eurasia Irina Busygina,Svetlana Krivokhizh,2023-05-22 This book explores power in international relations in a world characterized by the growing competition of major powers for smaller nations Focusing on the major powers and smaller countries of Eurasia it argues that power in international relations is different from coercion and is rather a social contract between a leader state and follower states where reciprocity is key and where leadership relationships cannot be adequately explained by focusing solely on the leader It challenges the perception that genuine regional leadership is quite common contending instead that it is rare that much more often major powers make claims for leadership and that regional leadership does not indicate the status of a particular state but rather the social role of the leader which is recognized by its followers a role which is always relative and based on communication and constant interaction with followers The book highlights the important role followers play in recognizing regional power the importance for a state s regional leadership strategy in creating and holding a valuable position attractive for followers and delivering greater value to followers compared to other potential leaders **The Supplement to The Modern Encyclopedia of Russian, Soviet and Eurasian History** George N. Rhyne,Edward J. Lazzerini,2000 *Eurasian Integration - The View from Within* Piotr Dutkiewicz,Richard Sakwa,2014-10-17 As Eurasia and the adjacent territories become more important to the world there is increasing interest from international powers accompanied by attempts to give institutional form to traditional economic and security links within the region This book includes a range of substantive work from scholars based in the region offering contrasting perspectives on the process of Eurasian integration and its place in the world Chapters consider economic political social and security developments with notable studies of the major countries involved in the development of the Eurasian Economic Union The work also examines the connections between the region and China greater Asia and the European Union It outlines the varying dynamics with populations growing in Central Asia while at best stagnant elsewhere The book discusses the increasing strategic significance of the region and explores how the new post Soviet states are growing in national cohesion and political self confidence Above all the book examines the concept of Eurasia outlining the debates about the concept and how various aspects of the legacy of Eurasianism contribute to contemporary plans for integration The book argues that although regional integration is very much a popular idea in our age with the potential for economic benefits and increased international influence in practice contemporary projects for Eurasian integration have been highly ambiguous and contested Nevertheless significant steps have been taken towards the creation

of the Eurasian Economic Union The book analyses developments to date noting the achievements as well as the challenges
