Russia Europe America An Architectural Cross Section:

Architectural Theory, Volume 2 Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco Prussian war of 1871 until the end of the twentieth century The entire two volume anthology follows the full range of architectural literature from classical times to present transformations An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China sea Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory Places the work of starchitects like Koolhaas Eisenman and Lyn alongside the work of prominent architectural critics offering a balanced perspective on current debates Includes many hard to find texts and works never previously translated into English Alongside Volume I An Anthology from Vitruvius to 1870 creates a stunning overview of architectural theory from early antiquity to the twenty first century *The Architectural Forum*, 1929

Russia Richard Anderson, 2015-11-15 This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

Russia in the German Global Imaginary James E. Casteel, 2016-05-06 This book traces transformations in German views of Russia in the first half of the twentieth century leading up to the disastrous German invasion of the Soviet Union in 1941 Casteel shows how Russia figured in the imperial visions and utopian desires of a variety of Germans including scholars journalists travel writers government and military officials as well as nationalist activists He illuminates the ambiguous position that Russia occupied in Germans global imaginary as both an imperial rival and an object of German power During the interwar years in particular Russia now under

Soviet rule became a site onto which Germans projected their imperial ambitions and expectations for the future as well as their worst anxieties about modernity Casteel shows how the Nazis drew on this cultural repertoire to construct their own devastating vision of racial imperialism

Re-Framing Identities Ákos Moravánszky,Torsten Lange,2016-12-19 From 1970 1990 architecture experienced a revision as part of the post modern movement The critical attitude to the functionalistic Moderne style and the influence of semiotics and philosophical trends such as phenomenology on architectural theory led to an increased interest in its history expression perception and context In addition architectural heritage and the care of architectural monuments gained importance This development also increasingly challenged the ideologically based division between East and West Instead of emphasizing the differences the search was for a joint cultural heritage The contributions in this volume question terms such as Moderne and post modern and show how architecture could again represent local regional and national identity

Architectural Forum ,1929

Wolkenbügel Richard Anderson,2024-04-09 How a visionary never realized architectural project devised by one of the twentieth century s greatest artists shaped architectural culture in Europe between the world wars After achieving international acclaim as a painter and designer El Lissitzky set out in 1924 to convince the world and himself that he was also an architect He did this with a project for a horizontal skyscraper which he gave an obscure and untranslatable name Wolkenbügel Eight of these buildings perched atop slender pillars were intended to stand at major intersections along Moscow s Boulevard Ring integrating the flow of tramlines subways and elevators In Wolkenbügel Richard Anderson explores Lissitzky s translation of visual and textual media into spatial ideas and offers an in depth study of the surviving drawings and archival artifacts related to Lissitzky s most complex architectural proposal This book offers a new and definitive account of how Lissitzky expanded the conceptual and representational tools available to the modern architect by drawing on many sources including photography typography exhibition design and even the elementary forms of the alphabet to create the Wolkenbügel Anderson shows how the production and reception of a paper project served to link key ideas and relationships that animated the worlds of art and architecture offering a new view on received histories of the interwar avant gardes By attending to Lissitzky s singular architectural project Anderson reveals the dynamics of internationality in the constitution of modern architectural culture in Europe

Creative Art ,1928 Includes book reviews

Watching the red dawn Barnaby Haran,2016-04-29 This book offers the first sustained examination of the cultural relations of the American and Soviet avant gardes in a period of major transformation

Eastern Europe Unmapped Irene Kacandes,Yuliya Komska,2017-10-01 Arguably more than any other region the area known as Eastern Europe has been defined by its location on the map Yet its inhabitants from statesmen to literati and from cultural economic elites to the poorest emigrants have consistently forged or fathomed links to distant lands populations and intellectual traditions Through a series of inventive cultural and historical explorations Eastern Europe Unmapped dispenses with scholars long time preoccupation with national and regional borders instead raising provocative questions about the area s

non contiguous and frequently global or extraterritorial entanglements **Pencil Points** ,1929 *Eric Mendelsohn* Arnold Whittick,1956 **American Architect and the Architectural Review** ,1893 **Art and Action in the Metropolis** John Henry Zammito,1978 **Proceedings of the 8th International Conference on Construction, Architecture and Technosphere Safety** Andrey A. Radionov,Dmitrii V. Ulrikh,Vadim R. Gasiyarov,2024-12-31 This book highlights recent findings in civil and environmental engineering and urban planning and provides an overview of the state of the art in these fields mainly in Russia and Eastern Europe A broad range of topics and issues in modern engineering are discussed including construction buildings and structures advanced materials innovative technology methods and techniques in civil engineering heating gas supply water supply and sewerage foundation engineering BIM structural reliability durability and monitoring special and unique structures construction bridge tunnel road railway engineering design and construction of hydraulic structures concrete engineering urban regeneration and sustainable development urban transport system engineering structure safety and disaster prevention water resources engineering water and wastewater treatment recycling and reuse of wastewater etc The volume gathers selected papers from the 8th International Conference on Construction Architecture and Technosphere Safety ICCATS held in Sochi Russia in September 2024 The authors are experts in various fields of engineering and all papers have been carefully reviewed *The American Architect* ,1916 **Willem Marinus Dudok, A Dutch Modernist** Donald Langmead,Willem Marinus Dudok,1996-04-18 This self taught Dutch architect was among the most widely copied architects of the 1930s and 1940s His international influence is all the more amazing when one considers that most of his architecture was built in the provincial town of Hilversum Travel word of mouth and literature spread the news of his humane modern approach to building design The more than 1 200 bibliographic entries in this work are presented alphabetically by decades and further by genres Each is summarized described and evaluated in the context of a critical overview of Dudok s career Architectural scholars and students will profit from this comprehensive guide to the international literature on one of the most emulated champions of modern architecture For too long much was made in the English language architectural literature of Germany s pioneer role in developing Modernism That contribution was undeniably valuable but the Dutch were unfairly overlooked however Dudok s work was not Hilversum became a magnet for young foreign architects in the 1930s He cast his spell upon much of continental Europe the United States and Britain and throughout the 1940s his style was so widely mimicked that a new adjective was coined dudoky This volume will reintroduce the importance of Dudok s work to today s scholars and students **American Architect** ,1902 [America's Religious Architecture](#) Marilyn J. Chiat,1997-10-07 From the Moorish synagogue in small Texas town to the New England meetinghouse nestled in the palm trees of Hawaii this comprehensive historical survey of America s religious architecture celebrates the country s ethnic and spiritual diversity through the magnificent breadth of these community landmarks The first comprehensive architectural and cultural history of its kind the book features 500 places of worship nationwide many

listed on the National Register of Historic Places Includes over 300 black and white photographs and foreword by Bill Moyers
creator of the PBS Genesis series *Review of Operations* United States Information Agency, 1971
