Russia And The West Environmental Discourses In The European Arctic:

Russia and the West Geir Hønneland, 2003-09-02 Hønneland assesses current environmental discourses and applies this analysis to look at the relations between Russia and the West with regards to environment problems. It includes three in depth case studies on environmental problems: living marine resources, nuclear safety and air pollution. *International Politics in the Arctic* Geir Hønneland, 2017-10-30 As the ice around the Arctic landmass recedes, the territory is becoming a flashpoint in world affairs. New trade routes cutting thousands of miles off journeys are available and the Arctic is thought to be home to enormous gas and oil reserves. The territorial lines are new and hazy. This book looks at how Russia deals with the outside world vis-à-vis the Arctic. Given Russia's recent bold foreign policy interventions, these are crucial issues and the realpolitik practiced by the Russian state is essential for understanding the Arctic's future. Here Geir Hønneland brings together decades of cutting edge research investigating the political contexts and international tensions surrounding Russia's actions. Hønneland looks specifically at region building and environmental politics of fishing and climate change, on nuclear safety and nature preservation and also analyses the diplomatic relations surrounding clashes with Norway and Canada as well as at the governance of the Barents Sea. *The Politics of the Arctic* is a crucial addition to our understanding of contemporary International Relations concerning the Polar North. **Climate Change Discourse in Russia** Marianna Poberezhskaya, Teresa Ashe, 2018-08-06 This book explores the development of climate change discourses in Russia. It contributes to the study of climate change as a cultural idea by developing the extensive Anglophone literature on environmental science, politics and policy pertaining to climate change in the West to consider how Russian discourses of climate change have developed. Drawing on contributors specialising in numerous periods, regions, disciplines and topics of study, the central thread of this book is the shared attempt to understand how environmental issues, particularly climate change, have been understood, investigated and conceptualised in Soviet and post-Soviet Russia. The chapters aim to complement work on the history of the discursive political construction of climate change in the West by examining a highly contrasting but intimately related cultural context. Russia remains one of the world's largest greenhouse gas emitters with one of the most carbon intensive economies. As the world begins to suffer the extreme consequences of anthropogenic climate change, finding adequate solutions to global environmental problems necessitates the participation of all countries. Russia is a central actor in this global process and it therefore becomes increasingly important to understand climate change discourse in this region. Insights gained in this area may also be illuminating for examining environmental discourses in other resource rich regions of the world with alternative economic and political experiences to that of the West, e.g. China, Middle East. This book will be of great interest to students and scholars of Russian environmental policy and politics, climate change discourses, environmental communication and environment and sustainability in general. **Russia as a Great Power** Jakob Hedenskog, Vilhelm Konnander, Bertil Nygren, Ingmar Oldberg, Christer Pursiainen, 2013-07-04 After a period of relative

weakness and isolation during most of the 1990s Russia is again appearing as a major security player in world politics This book provides a comprehensive assessment of Russia's current security situation addressing such questions as What kind of player is Russia in the field of security What is the essence of its security policy What are the sources capabilities and priorities of its security policy What are the prospects for the future One important conclusion to emerge is that while Russian foreign policy under Putin has become more pragmatic and responsive to both problems and opportunities the growing lack of checks and balances in domestic politics makes political integration with the West difficult and gives the president great freedom in applying Russia's growing power abroad

International Relations in the Arctic Leif Christian Jensen, 2015-10-12 As the ice around the Arctic landmass recedes progressively further each year the territory has become a flashpoint in world affairs New and lucrative trade routes from East to West are now becoming accessible for shipping lanes and military deployment and the Arctic is known to be home to large gas and oil reserves Yet the territorial boundaries of the region remain ill defined In response to these geographical changes the Scandinavian countries especially Denmark and Norway have begun staking large proprietary claims in the face of pressure from the major powers Russia Canada the US and China for the trade routes to be designated as International Waters Here Norwegian scholar Leif Christian Jensen shows how Norway has undergone a positional shift after declaring its assertive position on the Arctic in 2005 Its disputes with Russia have created a new foreign policy dilemma and a new set of red lines in Norwegian policy Is Norway as it would like to be seen an environmentally friendly peaceful enlightened nation Or does this geopolitical shift in world affairs necessitate a new and more aggressive Scandinavia

International Relations in the Arctic makes a timely contribution to the turn to the North in International Relations and Political Science

Russian Fisheries Management Geir Hønneland, 2004 This book is the first comprehensive introduction to Russian fisheries management in the Western literature It sets out the basic principles and organisational structure underlying Russian fisheries management and describes associated processes and practices such as quota allocation technical regulation and enforcement of fishery legislation The book focuses attention on fisheries management at the federal level and in Russia's northern fishery basin which is the largest fishery region in Europe Russia Problems such as institutional conflict alleged corruption and incomplete legislation on fisheries are discussed as are the assets of scientific and technical expertise found in the country's Soviet legacy Throughout the book the performance of the Russian system for fisheries management is evaluated in relation to the requirements of a precautionary approach to fisheries as set out in contemporary international law

Russia's Far North Veli-Pekka Tynkkynen, Shinichiro Tabata, Daria Gritsenko, Masanori Goto, 2018-03-09 The Russian Far North is immensely rich in resources both energy and other resources and is also one of the least developed regions of Russia This book presents a comprehensive overview of the region It examines resource issues and the related environmental problems considers the Arctic and the problems of sea routes maritime boundaries and military build up assesses economic development and

considers the ethnic peoples of the region and also cultural and artistic subjects Overall the book provides a rich appraisal of how the region is likely to develop in future **Law And Politics in Ocean Governance** Tore Henriksen, Geir Hønneland, Are K. Sydnes, 2006 Explores how the commitments based on the 1995 Fish Stocks Agreement are acted upon by States in a selection of regional fisheries management regimes This book reviews three established regional fisheries management regimes and two regional agreements establishing such regimes negotiated following the 1995 Agreement

How Europe Got Russia Wrong Veli-Pekka Tynkkynen, 2024-11-08 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com This topical book examines Europe's relationship with Russia from the 1990s onwards through three distinct lenses energy violence and the environment Veli Pekka Tynkkynen explores new ways of promoting and protecting the European objectives of peace sustainability democracy and the rule of law [The Routledge Handbook of Russian International Relations Studies](#) Maria

Lagutina, Natalia Tsvetkova, Alexander Sergunin, 2023-02-27 This handbook examines the study of international relations IR in Russia giving a comprehensive analysis of historical theoretic conceptual geographical and institutional aspects It identifies the place and role of Russia in global IR and discusses the factors that facilitate or impede the development of Russian IR studies The contributors represent diverse Russian regions and IR schools and offer an overview of different intellectual traditions and key IR paradigms in the post Soviet era Filling the vacuum in international understanding of the Russian perspective on pivotal international issues they demonstrate the continuity and change in Russia's international policy course over the past three decades and explain how different foreign policy schools and concepts have affected Russian foreign policy making and the decision making process Providing a unique contribution to the discussion on non Western IR theory this handbook will appeal to scholars and students of international relations Russian studies world politics and international studies

Global Challenges in the Arctic Region Elena Conde, Sara Iglesias Sánchez, 2016-08-05 Bringing together interconnected discussions to make explicit the complexity of the Arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level One of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests Against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region This perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the Arctic Council and the European Union with the particular roles and interest of Arctic and non Arctic states and the impact on indigenous populations environment including the relevance of national regulatory schemes and the intertwinement with concerns related to energy or migration strategy concentrating in geopolitical realities

and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges This collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes *The Changing Arctic and the European Union* Adam Stepien,Timo Koivurova,Paula Kankaanpää,2015-08-11 The Changing Arctic and the European Union provides a balanced and up to date overview of the multidimensional change taking place in the Arctic regions Against this background the role of the European Union regarding Arctic developments is considered including the ongoing process of formulating an umbrella EU Arctic policy In particular the themes of climate change maritime transport fisheries offshore oil and gas extraction mining land use and sociocultural change are discussed The book comprises primarily an updated and expanded version of the report Strategic Assessment of Development of the Arctic An assessment conducted for the European Union produced for the European Commission The report was to a great extent based on the interaction with Arctic stakeholders

The EU-Russia Borderland Heikki Eskelinen,Ilkka Liikanen,James W. Scott,2013-05-20 After the collapse of the Soviet Union there were high hopes of Russia's modernisation and rapid political and economic integration with the EU But now given its own policies of national development Russia appears to have limits to integration Today much European political discourse again evokes East West civilisational divides and antagonistic geopolitical interests in EU Russia relations This book provides a carefully researched and timely analysis of this complex relationship and examines whether this turn in public debate corresponds to local level experience particularly in border areas where the European Union and Russian Federation meet This multidisciplinary book covering geopolitics international relations political economy and human geography argues that the concept limits to integration has its roots in geopolitical reasoning it examines how Russian regional actors have adapted to the challenges of simultaneous internal and external integration and what kind of strategies they have developed in order to meet the pressures coming across the border and from the federal centre It analyses the reconstitution of Northwest Russia as an economic social and political space and the role cross border interaction has had in this process The book illustrates how a comparative regional perspective offers insights into the EU Russia relationship even if geopolitics sets certain constraints to co operation and market processes have led to conflict in cross border interaction several actors have been able to take initiative and create space for increasing cross border integration in the conditions of Russia's internal reconstitution **Arctic governance** Elana Wilson Rowe,2018-06-08 This electronic version has been made available under a Creative Commons BY NC ND open access license The volume explores a question that sheds light on the contested but largely cooperative nature of Arctic governance in the post Cold War period How does power matter and how has it mattered in shaping cross border cooperation and diplomacy in the Arctic The role of power in global governance cooperation has been explored in international relations and political geography literature yet largely overlooked in an Arctic context Through carefully selected case studies from Russia's role in the Arctic Council to the diplomacy of indigenous

peoples organizations this book seeks to shed light on how power performances are enacted to constantly shore up Arctic cooperation in key ways The conceptually driven nature of the inquiry makes the book appropriate reading for courses in international relations and political geography while the carefully selected case studies lend themselves to courses on Arctic politics

Tackling Space Helge Blakkisrud, Geir Honneland, 2006 The North is intrinsic to the way most outsiders imagine Russia snow long winters and the endless Siberian forests Indeed about 70 percent of the country's territory is defined as belonging to the North These inhospitable tracts contain immense natural wealth and large cities were constructed in Soviet times to supply the labor force for extraction industries Since the fall of the Soviet Union the Russian North has become both a burden and an asset It is overdeveloped with its now obsolete mono industrial towns and underdeveloped with its still largely untapped natural resources Today's Russian authorities face the challenge of developing a new Northern policy adapted to the realities of the 21st century With its expert contributions from political science economics geography and anthropology this book represents the first comprehensive study in the Western literature of federal politics towards the Russian North In addition to mapping the scope for federal governance it covers such important issues such as infrastructure development natural resource management environmental affairs and policies towards indigenous peoples

Arctic Euphoria and International High North Politics Geir Hønneland, 2017-08-02 This pivot describes the ups and downs of Norwegian High North politics since the end of the Cold War It considers how political interest in the Arctic has been growing rapidly in the international community as states stake their claim to areas of the continental shelf in the Arctic Ocean and focuses on Russia's actions as the Arctic state with the longest shoreline and the only one outside NATO The author argues that among the Western countries Norway has the most extensive experience in tackling Russia in the Arctic and the neighbourhood with the Russian Bear invariably shapes foreign policy notably in matters of security and how foreign policy concerns are intertwined with economic motives be that hopes of access to the big Russian market or to the oil and gas fields on the Russian Arctic shelf To achieve the combined goal of security and business the Norwegian Government has regularly orchestrated Arctic waves to direct the attention of local national and international politicians and businesses to the alleged opportunities of the North In this book the author takes us through the Great Barents Awakening of the 1990s the Great High North Enchantment of the early 2000s and recent years Arctic wave in Norwegian foreign policy

Borderland Russians G. Hønneland, 2010-10-13 Geir Hønneland discusses some of the big questions in social science What is identity What is the role of identity and narrative in the study of international relations The location is the Kola Peninsula the most heavily militarized area of the world during the Cold War now set to become Europe's next big oil playground

The Big Thaw Ezra B. W. Zubrow, Errol Meidinger, Kim Diana Connolly, 2019-09-01 Explores the unprecedented and rapid climate changes occurring in the Arctic environment Climate change one of the drivers of global change is controversial in political circles but recognized in scientific ones as being of central importance today for the United States and the world In The Big

Thaw the editors bring together experts advocates and academic professionals who address the serious issue of how climate change in the Circumpolar Arctic is affecting and will continue to affect environments cultures societies and economies throughout the world The contributors discuss a variety of topics including anthropology sociology human geography community economics regional development and planning and political science as well as biogeophysical sciences such as ecology human environmental interactions and climatology This book offers a valuable compendium on a broad spectrum of issues associated with climate change its implications and human adaptation in the Arctic Andrey N Petrov coauthor of Arctic Sustainability Research Past Present and Future *The Russian Cold* Julia Herzberg,Andreas Renner,Ingrid Schierle,2021-08-13 Cold has long been a fixture of Russian identity both within and beyond the borders of Russia and the Soviet Union even as the ongoing effects of climate change complicate its meaning and cultural salience The Russian Cold assembles fascinating new contributions from a variety of scholarly traditions offering new perspectives on how to understand this mainstay of Russian culture and history In chapters encompassing such diverse topics as polar exploration the Eastern Front in World War II and the iconography of hockey it explores the multiplicity and ambiguity of cold in the Russian context and demonstrates the value of environmental historical research for enriching national and imperial histories

Research Handbook on Communicating Climate Change David C. Holmes,Lucy M.
