Fighting Techniques of the Napoleonic Age Robert Bowman Bruce, 2008-04-15 Fighting Techniques of the Napoleonic World explores the tactics and strategy required to win battles with the technology available during the Napoleonic period 1789-1815 and points out how the development of such weapons technology changed the face of the battlefield. Divided into five sections, it highlights individual components of the armies: the foot soldier, the cavalryman, and the artilleryman; the equipment they wore and used; and how they fought together. Technology change, the emergence of military professionalism, and the impact these changes had on the battlefield. How units were used together on the battlefield and strategic positioning of battle units. Specialist techniques and equipment developed for artillery. Naval warfare from the ships in which the men fought to the weapons they carried.

Prussian Cavalry of the Napoleonic Wars (2) Peter Hofschröder, 2012-03-20 After Prussia's dismemberment, a drastic reorganisation of the entire army was necessary, and the cavalry underwent this process with the rest. At the time of the mobilisation in 1813, the somewhat reduced mounted arm was supplemented by voluntary and militia formations, and once peace was established after the First Abdication, a further reorganisation was begun. The fateful campaign of 1815 was fought with the Prussian cavalry still in the throes of this reorganisation. Packed with diagrams, illustrations, and eight full-page colour plates by Bryan Fosten, this book by Peter Hofschröder details the history, organisation, equipment, and uniforms of the Prussian cavalry which fought in the Napoleonic wars.
