proper management in key areas such as profile development quality control and plan maintenance approval plan overlap and vendor responsibilities Innovations covered include the call for introduction of approval plans to small college libraries the possibility of outsourcing technical service functions with vendor supplied cataloging and end processing the use of online services World Wide Web and the Internet to improve communication between vendors publishers and libraries and a list of criteria to be considered when selecting an automated acquisitions system Approval Plans is especially useful and timely as libraries are considering the best ways for acquiring books during an era of declining materials budgets This collection also has special importance in a broader sense to the many changes that are occurring in academic libraries today
