The American Corporation Today Carl

Kaysen,1996-10-31 Not since Edward Mason s classic book The Corporation in Modern Society appeared in 1959 has anyone compiled an authoritative overview of the American business firm Such a survey is now clearly overdue for in the last thirty years both the corporation and the business environment has changed radically In The American Corporation Today Carl Kaysen and other leading students of business and markets from around the country provide a much needed analysis of American corporate life at the end of the century Here is the American corporation from every angle its postwar history its relation to the law its financing its impact on technological innovation its role as employer and as political force and much more The contributors all of whom are recognized experts in their fields not only tackle many of the same key areas that the contributors to Mason s classic study looked at but they also illuminate issues that have only arisen in recent years For instance Raymond Vernon describes the increasing globalization of American business where the net income from operations outside the U S is now nearly half of that from domestic operations as opposed to one tenth in the 1950s James Q Wilson traces how the corporation has become a full time political actor showing how it reinvented its political strategy and tactics in the 1960s in the face of a wave of new consumer environmental and worker health legislation Gregory Acs and Eugene Steuerle show how the corporation promotes the commonweal acting as agent for the employee in purchasing pension health and other welfare benefit plans while Lester Thurow casts a critical eye at the decline of median real wages of American males over the last twenty years never before have a majority of American workers suffered real wage reductions while the real per capita gross domestic product was increasing In other pieces corporate finance experts Charles Calomiris and Carlos Ramirez advocate removing legal constraints on financial institutions that prevent them from providing the full range of business financing from short term debt to equity Michael Useem looks at the rise of education and training as a vexing corporate issue and Barbara Bergmann discusses the increasingly diverse work force arguing that ending bias is in the corporation s best interest And finally Neil Harris provides a fascinating discussion of architecture exploring how companies have become the principle patrons of important architecture since the 1950s Vital to everyone concerned with American big

business today this collection is sure to become the new standard upon which future studies of the corporation will be built

From Individualism to the Individual George M. Frankfurter, Elton G. McGoun, 2018-01-18 This title was first published in 2002 From Individualism to the Individual treats finance as a social and cultural process exploring the unseen side of academic discourse and the many obstacles the deeply entrenched elite puts in the way of alternative thinking Opening with a detailed discussion of the role of ideology in the perpetuation of the limited methodological bias of the profession toward markets the book then examines the more specific effects of such ideological limitations on theoretical and empirical research in finance The authors develop alternative ways to examine finance both as a profession and as a field of inquiry This book will be of particular value to researchers and practitioners working in finance as well as those in other social science disciplines whose research relates to finance culture and society

Reputation Transfer to Enter New B-to-B Markets Christine Falkenreck, 2009-10-17 An increasing number of products and services are not differentiated by inherent features but by the vendors particularly their reputation and marketing communication Consequently a positive reputation provides competing vendors with a virtually inimitable competitive advantage Contemporary research concerning antecedents and consequences of reputation in the domain of marketing is dominated by branding and line extension issues Organizations communication efforts and the relation of reputation and the communication media are not fully understood nor have they been challenged up to now Moreover customers perception of reputation is clearly embedded in their cultural context However contemporary marketing research restricts both conceptual and empirical considerations to Western type cultures Frequently even the differences in Western type cultures are neglected Considering these shortcomings in contemporary marketing research Dr Christine Falkenreck investigates the opportunities and limits and also the potential benefits and dangers of transferring a vendor's positive reputation to product categories never produced or offered by the considered vendor Embedding the empirical investigation of both reputation management and reputation transfer in a coherent theoretical framework which is grounded in the Commitment Trust theory is her merit She derives and validates an integrated model that appears to be valid in all cultures considered in her study The results of this analysis contribute substantially to our understanding of reputation measuring and managing These results are not restricted to academic interests and they provided practitioners with a variety of new insights Thus this thesis will be widely discussed in both academia and management practice
