Stress and the Family Volume I: Coping With Normative Transitions, Hamilton I. McCubbin and Charles R. Figley. New York, Brunner/Mazel, 1983. 216 pp. \$22.50, hardcover.

Coping With Normative Transitions is the first of two volumes that employ sociology research to focus on family stress. McCubbin and Figley have expanded the pioneering work of Reuben Hill into a general model of stress and family coping. As the editors state in their introduction, "Normative stressors and crises refer to those changes or life cycle transitions that are expected and predictable, which most or even all families will experience over the life cycle, and which require adjustment and adaptation. Stress is part of that developmental process" (p. xx). They delineate two sources of stress: normal life cycle transitions and unpredictable, catastrophic events.

Volume I begins with a conceptual chapter by McCubbin and Patterson outlining their theoretical model for understanding stress and the family's functional and dysfunctional coping patterns. Subsequent chapters, by contributors, consider two categories of stress: (a) family transitions (the life cycle) and (b) environmental demands on the family, such as work, societal stress (in the black family), environmental stress (in the rural family), and economic stress.

The editors gave each contributing author a set of objectives and specific questions within which to frame their essays. These involved understanding the family system as a stress absorber and stress producer, highlighting the particular stress in each life cycle phase, identifying important areas of research in the family stress field, and developing effective interventions for helping families to cope. This format gives the book a coherent structure.

McCubbin's and Patterson's chapter is one of the best, a concise presentation of their Double ABCX Model for understanding stress and the family's ability to cope. They define family stress as "a state that arises from an actual or perceived imbalance between demand (e.g., challenge, threat) and capability (e.g., resources, coping) in the family functioning" (p. 10). The Double ABCX Model is based on Hill's model. As Hill (2) describes it, "A (the stressor/crisis-provoking event), interacting with B (the family's crisis-meeting resources), interacting with C (the definition the family makes of the event), produces X (the crisis).

This model has become the cornerstone of family stress literature. It focuses on the precrisis variables that influence a family's ability to cope with stress. These variables determine whether the outcome will be a crisis for a particular family. McCubbin *et al.* have expanded the model to the *Double ABCX Model*, a more dynamic concept. In the Double Model, each factor is further developed: Aa, Bb, Cc. Thus, Aa implies the *pileup* of demands? the sum of many stressors, normative and nonnormative, that occur together. A given stressor (say, loss of father's job) can happen during the normal life cycle transition of another family member (son's adolescence), at a time that the family is already coping with strain (grandfather's death) and with the consequences of the family's shift in roles (mother went to work), all interacting to unbalance family stability. The factor Bb, family adaptation, describes the new structure needed to adapt to the pileup of stress, such as modification of roles, rules, and patterns of interaction. Adaptation is consolidated not only by intrafamily shifts but with the help of the family's natural support systems.

I wholeheartedly agree with the application of the stress concept to the life cycle. As a family therapist, this framework has always helped me to understand clinical dilemmas. Carter and McGoldrick (1) have presented the emotional tasks faced by the family system at each phase of its life cycle. Adding the Double ABCX Model allows us to look more closely at the configuration of stressors and coping efforts that result in some families' inability to adapt or to move to the next stage.

This volume seems to be addressed to an audience with varying levels of experience, and the roster of contributors reflects this diversity. Although all the authors follow the editors' format, there is wide variation in emphasis. Some focus more on reviewing the literature, others take a sociological approach, and still others write clinically. This diversity results in strengths and weaknesses, and overall I think the book works best for the student and the general reader. Experienced therapists may find some chapters oversimplified and trailing well behind the conceptual model. Among the most informative sections are those on marriage, sexuality, divorce, and the black family. The chapter on adolescence provides a beautiful synthesis of the model with a family systems point of view. The chapter on stepparenting, also outstanding, augments the stress model with direct clinical implications and recommendations.

In summary, Volume I is an ambitious work with wide relevance. For the student, it offers a rich overview of the family stress field and the family life cycle. The experienced clinician is well rewarded by this conceptual model and some of its applications but may be left desiring a stronger clinical and systems focus.

The Long Struggle Jerry M. Lewis, John G. Looney, 1983 *Black Families in Therapy* Nancy Boyd-Franklin, 2013-11-18

This classic text helps professionals and students understand and address cultural and racial issues in therapy with African American clients. Leading family therapist Nancy Boyd Franklin explores the problems and challenges facing African American communities at different socioeconomic levels, expands major therapeutic concepts and models to be more relevant to the experiences of African American families and individuals, and outlines an empowerment-based multisystemic approach to helping clients mobilize cultural and personal resources for change. *Black Families* Harold E. Cheatham, James B.

Stewart, 2017-10-19. The condition and characteristics of the black family have been subjects of intense debate since at least the 1960s when the Moynihan Report and the culture of poverty theses held sway. Since then, a consistent theme has been that black families are pathological. Despite the fact that research has been inconclusive and contradictory, political debate and policy have been strongly influenced by the pathology theme. This volume presents alternative approaches toward understanding the special characteristics of black families. Extending a special issue of *The Review of Black Political Economy*, the book focuses on the economic circumstances and decision making of these families, employing interdisciplinary and cross-cultural perspectives. It examines the general responses of black families to various external factors such as economic systems and to internal factors such as interpersonal relationships. This compendium of current thinking and research will be of interest to professionals in a number of fields, including family studies, counseling, social work, psychology, and sociology. It will be of practical use in training programs for service delivery systems. American Families Robert B. Hill, 1999-01-14. Returning to his innovative work of twenty-five years ago, Robert Hill once more offers an incisive analysis of five key cultural strengths of African American families. With compassion and eloquence, he argues that these existing strengths provide a solid foundation upon which to develop the kind of public policies and self-help initiatives that will truly promote the interests not only of the African American community but of our diverse nation as a whole.

A New Look at Black Families Charles V. Willie, Richard Reddick, 2003. Revised edition of classic textbook on black families. *A New Look at Black Families* Charles V. Willie, Richard J. Reddick, 2010-02-16. Charles Willie and Richard Reddick's *A New Look at Black Families* has introduced thousands of students to the intricacies of the Black family in American society since its publication in 1976. Using a case study approach, Willie and Reddick show the varieties of the Black family experience and how those experiences vary by socioeconomic status. In addition to examining families of low-income, working, and middle classes, the authors also look to the family experiences of highly successful African Americans to try to identify the elements of the family environment leading to success. The authors puncture the myth of the Black matriarchy prevalent in the popular imagination and they explore a variety of family configurations, including a family with same gender
