Williams,2008 After reviewing the available evidence from this extensive case study the author concludes that these conducted energy weapons are excluded as the cause of death in 182 of the 212 cases In only two cases did the evidence tend to confirm the weapon was either a cause of death or a significant contributing factor While arguing that the TASER electronic control devices are safe less lethal weapons the author also cautions that they are not completely effective *Official Gazette of the United States Patent and Trademark Office* ,2006 *American Philanthropic Foundations* David C. than focus on our underinvestment of health and overinvestment of criminal justice his idea of redistributing the poor draws attention to how state agencies circulate people between different institutional spaces in such a way that generates revenue for some agencies cuts costs for others and projects illusions that services have been legally rendered By centering the state's use of redistribution Lara Mill n shows how certain forms of social suffering the premature death of mainly poor people of color are not a result of the state's failure to act but instead the necessary outcome of so called successful policy *Grants for Religion, Religious Welfare, & Religious Education* ,2006 *Qualitative Research Methods for Media Studies* Bonnie S.
