Ultimate Guide to Lost Wax Casting Norman Collins, 2012-03 It has always been my ambition to produce a book and workshop manual on Lost Wax Casting incorporating all the knowledge I have gained in operating the process in various parts of the world for nearly 60 years Now that I have sold my last business and retired I have the opportunity to fulfill my ambition and to get all my experience down on paper and give new and experienced casters alike a useful and informative guide to the process I have had the privilege to develop and work with throughout my life I have now spent nearly a lifetime Designing and Manufacturing Jewellery using the Lost Wax Casting process also producing Precision Investment Lost Wax Castings for Industry and researching and writing this book about this wonderful process which has occupied nearly my whole life and in spite of my many highs and lows during that time I still feel that I would not have missed a minute of it I have achieved something special in my life and it brings me great pleasure now when I am able to help someone with their casting problems and I look forward to hearing from you Firstly I would like to introduce myself I have been producing lost wax castings for over 50 years man and boy in the last 10 years I decided I did not want all my knowledge to be lost when I die so I decided to write this book and to put in all my life s experiences good and bad in the early days the were Dental Mechanics using Lost wax casting to produce the metal parts of teeth plates etc and there were a few companies supplying Chemicals Investment Machinery Hand Tools Drills Burrs Etc Etc Etc the one I worked the mostly

with was a firm called Nesor Products as their family name was Rosen In those early days they even agreed to manufacture machines for us as we were much more involved in quantity rather than the Dentists as they were mostly involved in 1 offs as each item fitted mainly one patient as many times to make to Plates fit properly the Dentist got the patient to bite on a special piece of wax so that they obtained a near perfect fit Then once we were in production we used many different types of Chemical Companies Engineering Companies and with the Investments Suppliers

THE BASIC PRINCIPLE OF LOST WAX CASTING The problem associated with the first forms of casting was the removal of the original pattern or model therefore the process of lost wax casting is based on the use of a disposable pattern which will burn totally away at high temperature in an oxidizing atmosphere It is possible therefore to cast from any vegetable matter that after having been encapsulated in a suitable refractory type material is capable of being burnt away at high temperature to allow the metal that you wish to cast in to be melted and poured in to take its place In lost wax casting the chosen vegetable material will be wax in the beginning Bees wax was used the wax was modeled by hand but in more modern times many different waxes have been developed some for carving the original model which can be cast in metal cleaned up and used as a production model from which a rubber mould is made if you are producing Jewellery Ornaments or Statues but in the case of Industrial Precision Investment casting instead of making a model and then producing a rubber mould from which the wax patterns are made the mould is produced in metal which gives much more accurate dimensions for the finished castings The book is split into five sections in which I will cover a wide variety of aspects of Lost Wax Casting 1 History of Lost Wax Casting 2 The Theory of Lost Wax Casting 3 Step by Step Picture Guide 4 Workshop Manual 5 Autobiography All of the sections are designed to give you a thorough picture of where the Lost Wax Casting process came from the various ways in which the process has been used and how it is still used today in a myriad of industries from Dentistry through to Jewellery Making and even in the production

Index to Handicraft Books, 1974-1984 Carnegie Library of Pittsburgh. Science and Technology Department, 1986 Handicrafts and do it yourself projects have always been a library's most popular and heavily requested subject And for more than a decade a definitive index to handicraft books has not been published To fill this gap the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the Index to Handicraft Books listing more than 900 books and over 12 400 subject entries covering books published from 1974 to 1984 The Index to Handicraft Books is an essential reference tool for librarians who want to help someone find instructions for a varied range of do it yourself projects providing quick access to craft projects in books more recent than previous handicraft index books have listed Each entry in the index consists of a subject heading the name of the project as listed in the book the author and title of the book and the page numbers on which the project can be found The author and title correspond to those in the List of Works Cited section which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through inter library loan Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974 the list
