Lumbar Spine Disorders Current Concepts:

Lumbar Spine Disorders: Current Concepts Richard W Porter, Richard M Aspden, 1995-02-28 This book draws together recent results and ideas from most of the leading UK researchers into back pain The emphasis is on disorders of the lumbar spine their pathogenesis diagnosis and treatment This is in contrast to most books on the spine which either concentrate on the normal spine or deal with a specialised approach such as surgery By drawing together contributions from a wide range of clinical and scientific backgrounds including alternative therapies such as osteopathy and chiropractice the problem of low back pain is shown to be complex and multifactorial

Lumbar Spine Disorders: Current Concepts, Vol 2 Richard M Aspden, Richard W Porter, 1996-11-27 This is a companion to Volume 1 with the same title and a similar approach namely to draw together current understanding of the multifactorial nature of back pain Both volumes together contain chapters contributed by most of the leading researchers into back pain in the UK and as such they constitute an unparalleled resource Rather than concentrating on specialist areas such as surgery or the lumbar spine the emphasis is on understanding the function and failure of the spine and its component tissues As such it contains material which is applicable to anyone with an interest in any aspect of the spine from biomechanics to blood flow epidemiology to economics nerves to nutrition and everything else in between

Advances in Psychological Science, Volume 2 Fergus Craik, Michele Robert, 2014-01-21 The chapters in this volume are the edited versions of invited addresses to the XXVI International Congress of Psychology held in Montr al in August 1996 As one major goal of the Congress was to promote communication among specializations in scientific psychology the speakers were asked to survey their research area and present their own work in a way that would be accessible to their colleagues in other areas Another purpose of the meeting was to bring researchers together from different parts of the world reflecting their different approaches to the scientific study of mind brain and behavior Consequently the eminent researchers who have written the twenty six chapters included in the present volume were drawn from universities and research institutes in North America Europe Japan Russia Israel and New Zealand The chapters cover a range of topics in human and animal experimental psychology The first section deals with psychobiological processes the interplay of body and mind in determining intelligence stress and pain The next five chapters address current issues in neuropsychology and neuroscience including the neural correlates of attention and vision A third section looks at learning processes in humans and animals and a fourth deals with a range of topics in perception and cognition The final five chapters take a developmental perspective presenting theoretical and empirical analyses of the acquisition of perceptual and cognitive abilities Overall the collection illustrates the growing trend to break down traditional barriers between areas of experimental psychology there are many instances of profitable interactions between researchers studying aspects of behavior and those studying the biological bases of these behaviors The twenty six chapters give an excellent overview of current research in scientific psychology
