

one who was being used by the Elector as a means of bringing into reality his own idea of a territorial church.

In gaining support for Bernhardi's bold step the *Schutzschrift* undoubtedly played its part. It may have been written by Bernhardi although it does not bear his name, yet it is written throughout in the first person singular. Various authors have been suggested—Bernhardi, Carlstadt, and Melanchthon. Dr McEwan considers, however, that Bernhardi was undoubtedly the inspirer of the text, but only probably its author. It may well be a composite work in which both Luther and Melanchthon had a hand, but not Carlstadt. Probably the number of copies initially printed was quite small and that fact may well account at least in part for the rapid appearances of the vernacular versions, which were intended for the simple reader and which are distinguished by their forthright bluntness of expression. The argument, too, is simple and straightforward. It distinguishes between laws that are God's and those that are man-made, argues that the celibacy of the clergy is a man-made law, and insists on the right of all Christians to follow God's Law.

Luther and the Modern State in Germany. Edited by James D. Tracy. Sixteenth Century Essays and Studies, vol. 7; Kirksville, Mo: Sixteenth-Century Journal, 1986. 108 pp. \$25.00 paperback.

This miscellany of conference papers and one-off lectures considers in brief compass three related themes: Luther's political views, the impact of the Reformation on German territorial states in the sixteenth century, and the consequences of both for later German history. It is overambitious in attempting to address both beginning students and interested scholars, questions of history and those of historiography, and every century since the sixteenth. Thus T. A. Brady, Jr. and E. W. Gritsch, from different vantage-points, both discuss not only Luther's political views in their social and theological context but some later developments. As a result neither sixteenth-century Lutheranism nor its sequels receive the full, coherent treatment they deserve, although both authors advance interesting points supported by well-chosen quotations. B. O. Peterson makes a greater impact just because he confines himself to a survey of recent Luther scholarship in the German Democratic Republic. For Anglophone readers the most useful contributions must be those of the Germans K. Blaschke and H. Schilling, who have both worked intensively on the sixteenth century but have hitherto published little in English. Blaschke, from the perspective of an ecclesiastical historian of the GDR, describes the growth of the Lutheran territorial state in Albertine Saxony, emphasizing the elements of territorial expansion and bureaucracy. In assuming that Saxony was the prototype for such states everywhere in the Empire, he overlooks the divergences between smaller and larger states, northern and southern ones, and more besides, of which Schilling is more aware.

Schilling stresses the importance from the later sixteenth century onwards of the process of confessionalization, not only in Lutheran states but in Catholic and Reformed ones as well. Because state-building developed later in the Empire than in the rest of Europe, and latest of all in the smaller German political entities, it was more influenced there by the growing rigidities of confessional conflict, which aug-

Luther And The Modern State In Germany:

Luther and the Modern State in Germany James D. Tracy, 1986 *Church Robbers and Reformers in Germany, 1525-1547* Christopher Ocker, 2006-07-01 This is a study of the religious controversy that broke out with Martin Luther from the vantage of church property The controversy eventually produced a Holy Roman Empire of two churches This is not an economic history Rather the book shows how acceptance of confiscation was won and how theological advice was essential to the success of what is sometimes called a crucial if early stage of confessional state building It reviews the character of sacred property in the late Middle Ages surveys confiscations in Reformation Germany on illustrative examples summarizes the League of Schmalkalden s defense of confiscations systematically studies theological memoranda that shaped a common policy in the League and shows the role of that common position in religious politics *Pietism and the Making of Eighteenth-Century Prussia* Richard L. Gawthrop, 2006-11-02 This work describes the relationship between Pietism and the rise of the Prussian state **The Oxford History of Modern German Theology, Volume 1: 1781-1848** Grant Kaplan, Kevin M. Vander Schel, 2023-05-20 From the closing decades of the eighteenth century German theology has been a major intellectual force within modern western thought closely connected to important developments in idealism romanticism historicism phenomenology and hermeneutics Despite its influential legacy however no recent attempts have sought to offer an overview of its history and development Oxford History of Modern German Theology Vol I 1781 1848 the first of a three volume series provides the most comprehensive multi authored overview of German theology from the period from 1781 1848 Kaplan and Vander Schel cover categories frequently omitted from earlier overviews of the time period such as the place of Judaism in modern German society race and religion and the impact of social history in shaping theological debate Rather than focusing on individual figures alone Oxford History of Modern German Theology Vol I 1781 1848 describes the narrative arc of the period by focusing on broader intellectual and cultural movements ongoing debates and significant events It furthermore provides a historical introduction to each of the chronological subsections that divides the book Moreover unlike previous efforts to introduce this time period and geographical region the volume offers chapters covering such previously neglected topics as religious orders the influence of Romantic art secularism religious freedom and important but overlooked scholarly initiatives such as the Corpus Reformatorum Attention to such matters will make this volume an invaluable repository of scholarship and knowledge and an indispensable reference resource for decades to come

Early Modern Germany, 1477-1806 Michael Hughes, 1992-05 Attempts to present a coherent account of early modern German history are often hampered by the German equivalent of the Whig theory of history by which all useful roads lead up to the creation of the nineteenth century power state Machstaat or institutional state Anstalstaat In this kind of historiography there are large blank areas between the important events like the Reformation the Thirty Years War the Seven Years War and the French Revolution During the intervals of apparent stagnation between these events Germany seems to

disappear to be replaced by states such as Prussian and Austria Saxony Bavaria and the Palatinate Substantial areas are ignored and groups such as the parliamentary Estates which stood in the way of state building are virtually written out of most accounts Rather than focusing on the separate histories of the individual German states Michael Hughes looks to the structure of the Holy Roman Empire in its final centuries and writes an account of Germany as a functioning federative state with institutions capable of reform and modernization For nineteenth and twentieth century historians the Empire was seen as the embodiment of division and weakness But by examining the first Reich Hughes reveals the persistence of the idea of Germanness and German national feeling during a period when according to most accounts Germany had virtually ceased to exist At the same time he examines the element of continuity in Germany's development in an attempt to discover how far back in Germany's past it is necessary to go to find the roots of the German problem the Germans search for a political expression of their strongly developed awareness of cultural unity The Lutheran Church and the East German State Robert Goeckel, 2019-05-15 Robert Goeckel here explains why despite the ideological antagonism between Marxism Leninism and Christianity a working relationship developed between East Germany's Communist rulers and the country's Evangelical Lutheran Church By reconstructing how the church won a measure of autonomy and became a forum for dissent The Lutheran Church and the East German State deepens our understanding of the popular forces that swept the Honecker regime from power in the fall of 1989 *The Early Reformation in Germany* Tom Scott, 2016-03-23 Over the last twenty years research on the Reformation in Germany has shifted both chronologically and thematically toward an interest in the long or delayed Reformations and the structure and operation of the Holy Roman Empire Whilst this focus has resulted in many fascinating new insights it has also led to the relative neglect of the early Reformation movement Put together with the explicit purpose of encouraging scholars to reengage with the early storm years of the German Reformation this collection of eleven essays by Tom Scott explores several issues in the historiography of the early Reformation which have not been adequately addressed The debate over the nature and function of anticlericalism remains unresolved the mainsprings of iconoclasm are still imperfectly understood the ideological role of evangelical doctrines in stimulating and legitimising popular rebellion above all in the German Peasants War remains contentious while the once uniform view of Anabaptism has given way to a recognition of the plurality and diversity of religious radicalism Equally there are questions which initially broached have then been sidelined with undue haste the failure of Reforming movements in certain German cities or the perception of what constituted heresy in the eyes of the Reformers themselves and not least the part played by women in the spread of evangelical doctrines Consisting of seven essays previously published in scholarly journals and edited volumes together with three new chapters and an historical afterword Scott's volume serves as a timely reminder of the importance of the early decades of the sixteenth century By reopening seemingly closed issues and by revisiting neglected topics the volume contributes to a more nuanced understanding of what the Reformation in Germany entailed **A History of**

Ecumenism, Memory, and German Nationalism, 1817-1917 Stan M. Landry, 2014-02-11 Explores the relationship among the German confessional divide collective memories of religion and the construction of German national identity and difference It argues that nineteenth century proponents of church unity used and abused memories of Martin Luther and the Protestant Reformation to espouse German religious unity which would then serve as a catalyst for German national unification

Philip Sidney and the Poetics of Renaissance Cosmopolitanism Robert E. Stillman, 2016-04-22 Celebrations of literary fictions as autonomous worlds appeared first in the Renaissance and were occasioned paradoxically by their power to remedy the ills of history Robert E Stillman explores this paradox in relation to Philip Sidney's *Defence of Poesy* the first Renaissance text to argue for the preeminence of poetry as an autonomous form of knowledge in the public domain Offering a fresh interpretation of Sidney's celebration of fiction making Stillman locates the origins of his poetics inside a neglected historical community the intellectual elite associated with Philip Melanchthon leader of the German Reformation after Luther the so called Philippists As a challenge to traditional Anglo centric scholarship his study demonstrates how Sidney's education by Continental Philippists enabled him to dignify fiction making as a compelling form of public discourse compelling because of its promotion of powerful new concepts about reading and writing its ecumenical piety and its political ambition to secure through natural law from universal Ideas freedom from the tyranny of confessional warfare Intellectually ambitious and wide ranging this study draws together various elements of contemporary scholarship in literary religious and political history in order to afford a broader understanding of the *Defence* and the cultural context inside which Sidney produced both his poetry and his poetics
