Ma Kiley The Life Of A Railroad Telegrapher:

Ma Kiley Thomas C. Jepsen,1997 This is the story of Ma Kiley a Texas born railroad telegraph operator who worked as a boomer in the American West Mexico and Canada in the early 1900s Although autobiographical writings by women telegraph operators are rare Ma Kiley left a richly detailed and moving personal account of her life and work in *The Bug* and I first published by Railroad Magazine in 1950 This book also includes an introduction which provides background on telegraphy a little known area of women s work It attempts to fill in the missing history of women in telegraphy how women gained access to the field of telegraphy how they were viewed by their male co workers and how women operators struggled to establish their own identities

The Station Agent and the American Railroad Experience H. Roger Grant,2023-01-03 Before the widespread popularity of automobiles buses and trucks freight and passenger trains bound the nation together *The Station Agent and the American Railroad Experience* explores the role of local frontline workers that kept the country s vast rail network running Virtually every community with a railroad connection had a depot and an agent These men and occasionally women became the official representatives of their companies and were highly respected They met the public when they sold tickets planned travel itineraries and reported freight and express shipments Additionally their first hand knowledge of Morse code made them the most informed in town But as times changed so did the role of and the need for the station agent Beautifully illustrated with dozens of vintage photographs *The Station Agent and the American Railroad Experience* brings back to life the day to day experience of the station agent and captures the evolution of railroad operations as technology advanced

Iron Women Chris Enss,2021-03-01 2022 Will Rogers Medallion Award Silver Winner for Western Non Fiction When the last spike was hammered into the steel track of the Transcontinental Railroad on May 10 1869 at Promontory Point Utah Western Union lines sounded the glorious news of the railroad s completion from New York to San Francisco For more than five years an estimated four thousand men mostly Irish working west from Omaha and Chinese working east from Sacramento moved like a vast assembly line toward the end of the track Editorials in newspapers and magazines praised the accomplishment and some boasted that the work that was begun carried on and completed solely by men The August edition of Godey s Lady s Book even reported No woman had laid a rail and no woman had made a survey Although the physical task of building the railroad had been achieved by men women made

significant and lasting contributions to the historic operation However the female connection with railroading dates as far back as 1838 when women were hired as registered nurses stewardesses in passenger cars Those ladies attended to the medical needs of travelers and also acted as hostesses of sorts helping passengers have a comfortable journey Beyond nursing and service roles however women played a larger part in the actual creation of the rail lines than they have been given credit for Miss E F Sawyer became the first female telegraph operator when she was hired by the Burlington Railroad in Montgomery Illinois in 1872 Eliza Murfey focused on the mechanics of the railroad creating devices for improving the way bearings on a rail wheel attached to train cars responded to the axles Murfey held sixteen patents for her 1870 invention In 1879 another woman inventor named Mary Elizabeth Walton developed a system that deflected emissions from the smoke stacks on railroad locomotives She was awarded two patents for her pollution reducing device Their stories and many more are included in this illustrated volume celebrating women and the railroad Railroad History ,1999 *My Sisters Telegraphic* Thomas C. Jepsen,2000 This study also explores the surprising parallels between the telegraphy of the nineteenth century and the work of women in technical fields today The telegrapher s work like that of the modern computer programmer involved translating written language into machine readable code And anticipating the Internet by over one hundred years telegraphers often experienced the gender neutral aspect of the cyberspace they inhabited BOOK JACKET

Telegraphies Kay Yandell,2019 *Telegraphies* reveals a body of literature in which Americans of all ranks imagine how nineteenth century telecommunications technologies forever alter the way Americans speak write form community and conceive of the divine *Railfan & Railroad* ,1999 **The City in Texas** David G. McComb,2015-02-15 This book is the first history of cities in Texas covering the earliest days of Spanish Mexican towns the Republic era to about 1940 and metropolitan Texas to the present Not only is this book a first for Texas but there seem to be no equivalent books for any other states so the author has developed new concepts like the first road frontier and the rupture caused by the railroads McComb emphasizes how railroads and related innovations such as the telegraph and the clock facilitated in urban development Provided by publisher Boys and Their Toys Roger Horowitz,2013-10-18 Negotiating the divide between respectable manhood and rough manhood this book explores masculinity at work and at play through provocative essays on labor unions railroads vocational training programs and NASCAR racing
