Machine In America:

The Machine in America Professor Carroll Pursell, Carroll W. Pursell, 1995 From the medieval farm implements brought by the first colonists to the invisible links of the Internet the history of technology in America is a history of our society as well Arguing that the tools and processes we use are a part of our lives not simply instruments of our purpose historian Carroll Pursell analyzes technology s impact upon the lives of women and men their work politics and social relationships and in turn their influence upon technological development Pursell shows how both the idea of progress and the mechanical means to harness the forces of nature developed and changed as they were brought from the Old World to the New He describes the ways in which American industrial and agricultural technology began to take on a distinctive shape as it adapted and extended the technical base of the industrial revolution He discusses the innovation of an American System of Manufactures and the mechanization of agriculture new systems of mining lumbering and farming which helped conquer and define the West and the technologies that shaped the rise of cities And he shows how the export of technology helped to foster American hegemony both in the Western Hemisphere and elsewhere in the world Pursell also argues that American technology has created a social hegemony not only over the way we live but also over how we evaluate that life He shows that such developments as scientific management techniques and industrial research changed Americans lives as much as the mass production of such durable consumer goods as radios and automobiles In many ways he concludes today s military industrial complex is the legacy of the intense cooperation between science and technology during World War II

innovation of an American system of manufactures **America's War Machine** James McCartney, Molly Sinclair
 McCartney, 2015-10-27 A veteran Washington reporter reveals how years of military slanted domestic and foreign policy have turned the U S into a perpetual war machine When President Dwight D Eisenhower prepared to leave the White House in 1961 he did so with an ominous message for the American people about the disastrous rise of the military industrial complex Fifty years later the complex has morphed into a virtually unstoppable war machine one that dictates U S economic and foreign policy in a direct and substantial way Based on his experiences as an award winning Washington based reporter covering national security James McCartney presents a compelling history from the Cold War to present day that shows that the problem is far worse and far more wide reaching than anything Eisenhower could have imagined Big Military has become too big to fail and has grown to envelope the nation s political cultural and intellectual institutions These centers of power and influence including the now complicit White House and Congress have a vested interest in preparing and waging unnecessary wars The authors persuasively argue that not one foreign intervention in the past 50 years has made us or the world safer With additions by Molly Sinclair McCartney a fellow journalist with 30 years of experience America s War Machine provides the context for today s national security state and explains what can be done about it **America's Money Machine** Elgin Groseclose, 1966 **Machine Tools in Latin America** United States.
