Makers Of The Media Mind Journalism Educators And Their Ideas:

Makers of the Media Mind Wm. David Sloan, 2014-07-10 *Makers of the Media Mind* is a collection of analytical essays focusing on the most important and original ideas contributed to the field of mass communication by journalism educators. Divided into six sections representing the most prominent areas of specialization in the field, this text serves two significant purposes: first, it acquaints readers with the lives of preeminent journalism educators; second, it provides concise discussions and evaluations of the most compelling ideas those educators have to offer. The editor and contributors to this text contend that ideas cannot be appreciated fully without an understanding of the creators of those same ideas. They hope that this volume's coverage of creators as well as concepts will demonstrate that journalism education has played a critical role in the making of the media mind.

Makers of the Media Mind William David Sloan, 1990 First Published in 1990 Routledge is an imprint of Taylor Francis, an information company. **The A to Z of Journalism** Ross Eaman, 2009-10-12 Journalism is the discipline of gathering, writing, and reporting news, and it includes the process of editing and presenting news articles. Journalism applies to various media, including but not limited to newspapers, magazines, radio, television, and the internet. The word journalist started to become common in the early 18th century to designate a new kind of writer. About a century before journalism made its appearance to describe what those writers produced, though varying in form from one age and society to another, it gradually distinguished itself from other forms of writing through its focus on the present, its eye-witness perspective, and its reliance on everyday language. *The A to Z of Journalism* relates how journalism has evolved over the centuries. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the different styles of journalism, the different types of media, and important writers and editors. *An Integrated Approach to Communication Theory and Research* Don W. Stacks, Michael B. Salwen, 2014-04-08 This volume provides an overview of communication study, offering theoretical coverage of the broad scope of communication study as well as integrating theory with research. To explicate the integration process, the chapter contributors, experts in their respective areas, offer samples in the form of hypothetical studies, published studies, or unpublished research showing how theory and research are integrated in their particular fields. The book will appeal to graduate students and faculty members who want a thorough overview of not only the field but also sample research stemming from its various component parts.

Journalism in the United States Edd Applegate, 2011-05-19 Print and broadcast journalism in the United States have changed in recent years as a result of millions of people using the Internet and social media for obtaining some or most of the information they desire. So notes professor of journalism Edd Applegate, who, after surveying the decline in circulation and advertising revenues of newspapers and broadcast and radio news stations and the rise of cable news and website journalism, outlines in *Journalism in the United States: Concepts and Issues* the effect of this sea of change on key matters in journalism today. In this work, Applegate updates readers on the current conditions of the print and broadcast industries with chapters

on a variety of topics from theories of the press to the structure of the print and broadcast industries from the role of advertising and public relations to the role of the changing view of the press views of and commitments to objectivity and news balance Throughout Applegate obliges readers to wrestle with how the change in medium from print or broadcast to Web is not the main culprit in how the news has changed Instead he illustrates how many of the core issues remain unchanged and what is needed is a more complex analysis of core concepts and issues and how these have been affected from freedom of the press to the treatment of minorities by the evolution of news as a business and the education of journalists today for that business With a selected bibliography and an index to assist the reader this book is a wonderful text for upper level undergraduates graduates and college faculty with journalism or mass communications courses as well as for academic libraries
