Making Beaubourg A Building Biography:

The Making of Beaubourg Nathan Silver, 1997-02-24 This is the story of how France's famed cultural icon one of the most controversial and supremely public buildings of the century was designed and built Nathan Silver's detailed account of the Centre Pompidou still called Beaubourg by its designers and by Parisians takes the form of a fascinating and insightful building biography Not just a book about a building but about the making of a building this fresh heterodox means of inquiry is a holistic reading of the intricate process of creating architecture in contemporary society that brings to light its human story encompassing its stylistic historical technical and social aspects Beaubourg Silver reveals was unlike anything that had ever been built A realization of ideals and aspirations of its architectural generation a rethinking of fundamental precepts of design and construction it took nothing for granted and it has since become one of the most popular tourist attractions in Europe flaunting new principles that other architects have to come to terms with *Designing Urban Transformation* Aseem Inam, 2013-10-23 While designers possess the creative capabilities of shaping cities their often singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form In response to this paradox *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better The book focuses on a powerful question What can urbanism be by arguing that the most significant transformations occur by fundamentally rethinking concepts practices and outcomes Drawing inspiration from the philosophical movement known as Pragmatism the book proposes three conceptual shifts for transformative urban practice a beyond material objects city as flux b beyond intentions consequences of design and c beyond practice urbanism as creative political act Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo Horizonte Boston Cairo Karachi Los Angeles New Delhi and Paris The book is a rare integration of theory and practice that proposes essential ways of rethinking city design and building processes while drawing critical lessons from actual examples of such processes Facilities Change Management Edward Finch, 2011-11-14 Modern organisations are subject to continual change technologies evolve organisational structures are modified people and underlying cultures are transformed Yet the facilities that organisations occupy are static and can impede the changes that are essential to organisational survival The response to change in terms of property and support services is often too little too late leading to facilities that do not support organisational reality The facilities management team is thus constantly challenged to bridge the gap between what an organisation has and what it needs *Facilities Change Management* is a practical evaluation of the management of change for facilities managers and related professions It considers the forces of change affecting facilities decisions the obstacles to change at a resource level and human level the effective implementation of change the human aspect of change Each of these is considered in relation

to modern facilities management issues The discussion will enable practising facilities managers project managers surveyors service providers and architects to understand engage with and manage facilities change effectively at a strategic level Through real life case studies it demonstrates the complexities of change and hidden elements of change that may undermine carefully planned projects *Collections Vol 10 N1* Collections,2014-03-18 Collections A Journal for Museum and Archives Professionals is a multi disciplinary peer reviewed journal dedicated to the discussion of all aspects of handling preserving researching and organizing collections Curators archivists collections managers preparators registrars educators students and others contribute **Parisians** Graham Robb,2011-04-11 The New York Times bestseller the secrets of the City of Light revealed in the lives of the great the near great and the forgotten by the author of the acclaimed The Discovery of France This is the Paris you never knew From the Revolution to the present Graham Robb has distilled a series of astonishing true narratives all stranger than fiction of the lives of the great the near great and the forgotten A young artillery lieutenant strolling through the Palais Royal observes disapprovingly the courtesans plying their trade A particular woman catches his eye nature takes its course Later that night Napoleon Bonaparte writes a meticulous account of his first sexual encounter A well dressed woman fleeing the Louvre takes a wrong turn and loses her way in the nameless streets of the Left Bank For want of a map there were no reliable ones at the time Marie Antoinette will go to the guillotine Baudelaire the photographer Marville Baron Haussmann the real life Mimi of La Boh me Proust Adolf Hitler touring the occupied capital in the company of his generals Charles de Gaulle who is suspected of having faked an assassination attempt in Notre Dame these and many more are Robb s cast of characters and the settings range from the quarries and catacombs beneath the streets to the grand monuments to the appalling suburbs ringing the city today The result is a resonant intimate history with the power of a great novel **The Architecture of Neoliberalism** Douglas Spencer,2016-10-20 The Architecture of Neoliberalism pursues an uncompromising critique of the neoliberal turn in contemporary architecture This book reveals how a self styled parametric and post critical architecture serves mechanisms of control and compliance while promoting itself at the same time as progressive Spencer s incisive analysis of the architecture and writings of figures such as Zaha Hadid Patrik Schumacher Rem Koolhaas and Greg Lynn shows them to be in thrall to the same notions of liberty as are propounded in neoliberal thought Analysing architectural projects in the fields of education consumption and labour The Architecture of Neoliberalism examines the part played by contemporary architecture in refashioning human subjects into the compliant figures student entrepreneurs citizen consumers and team workers requisite to the universal implementation of a form of existence devoted to market imperatives The Architecture of Persistence David Fannon,Michelle Laboy,Peter Wiederspahn,2021-08-24 The Architecture of Persistence argues that continued human use is the ultimate measure of sustainability in architecture and that expanding the discourse about adaptability to include continuity as well as change offers the architectural manifestation of resilience Why do some buildings last for generations as beloved and useful places while others do not How can designers

today create buildings that remain useful into the future While architects and theorists have offered a wide range of ideas about building for change this book focuses on persistent architecture the material spatial and cultural processes that give rise to long lived buildings Organized in three parts this book examines material longevity in the face of constant physical and cultural change connects the dimensions of human use and contemporary program and discusses how time informs the design process Featuring dozens of interviews with people who design and use buildings and a close analysis of over a hundred historic and contemporary projects the principles of persistent architecture introduced here address urgent challenges for contemporary practice while pointing towards a more sustainable built environment in the future The Architecture of Persistence Designing for Future Use offers practitioners students and scholars a set of principles and illustrative precedents exploring architecture s unique ability to connect an instructive past a useful present and an unknown future

Architecture, Politics, and Identity in Divided Berlin Emily Pugh, 2014-03-21 On August 13 1961 under the cover of darkness East German authorities sealed the border between East and West Berlin using a hastily constructed barbed wire fence Over the next twenty eight years of the Cold War the Berlin Wall grew to become an ever present physical and psychological divider in this capital city and a powerful symbol of Cold War tensions Similarly stark polarities arose in nearly every aspect of public and private life including the built environment In *Architecture Politics and Identity in Divided Berlin* Emily Pugh provides an original comparative analysis of selected works of architecture and urban planning in both halves of Berlin during the Wall era revealing the importance of these structures to the formation of political cultural and social identities Pugh uncovers the roles played by organizations such as the Foundation for Prussian Cultural Heritage and the Building Academy in conveying the political narrative of their respective states through constructed spaces She also provides an overview of earlier notable architectural works to show the precursors for design aesthetics in Berlin at large and considers projects in the post Wall period to demonstrate the ongoing effects of the Cold War Overall Pugh offers a compelling case study of a divided city poised between powerful contending political and ideological forces and she highlights the effort expended by each side to influence public opinion in Europe and around the World through the manipulation of the built environment

Winnipeg Modern Serena Keshavjee, 2006-09-15 A vivid stylish and fascinating look at internationally acclaimed architects and their work Beginning in the 1940s John A Russell dean of the School of Architecture at the University of Manitoba nurtured a strong

tradition of Modernist design with close connections to architectural giants such as Mies van der Rohe and Walter Gropius. Under Russell's guidance, a generation of young architects such as James Donahue and David Thordarson adapted the principles of European Modernism to the prairie geography. Other nationally renowned architects such as Jeanne Gaboury and Gustavo da Roza also left a lasting Modernist mark on Winnipeg's skyline and private residences. Edited by Serena Keshavjee and designed by architect Herbert Enns, *Winnipeg Modern* captures the grace and beauty of the Modernist period and includes critical and historical essays on the aesthetic and social project of Modernist architecture in Winnipeg. Lavishly illustrated with 300 photographs from provincial archives, the private archives of architect Henry Kalen, and contemporary photographer Martin Tessler, this book is a testament to the Modernist principles of structural expression and purity of form.
