March Of Democracy 7vol Record Of 64:

Communicative Rationality and Deliberative Democracy of Jürgen Habermas Ukoro Theophilus Igwe, 2004 This book critically investigates Jürgen Habermas's attempt to develop communicative conception of human rationality. It explores Habermas's fundamental commitment to the practical import and ramifications of communicative rationality in the field of African political philosophy. Within this context Habermas's ambitious project to reconcile law, justice and democracy is wide ranging. This work explores how it is among other things that deliberative institutions can become more democratic through as Dewey put it improvements in the methods and conditions of debate, discussion and persuasion.

Death in the Congo Emmanuel Gerard, Bruce Kuklick, 2015-02-10 Death in the Congo is a gripping account of a murder that became one of the defining events in postcolonial African history. It is no less the story of the untimely death of a national dream, a hope filled vision very different from what the war ravaged Democratic Republic of the Congo became in the second half of the twentieth century. When Belgium relinquished colonial control in June 1960 a charismatic thirty five year old African nationalist Patrice Lumumba became prime minister of the new republic. Yet stability immediately broke down. A mutinous Congolese Army spread havoc while Katanga Province in southeast Congo seceded altogether. Belgium dispatched its military to protect its citizens and the United Nations soon intervened with its own peacekeeping troops. Meanwhile behind the scenes both the Soviet Union and the United States maneuvered to turn the crisis to their Cold War advantage. A coup in September secretly aided by the UN toppled Lumumba's government. In January 1961 armed men drove Lumumba to a secluded corner of the Katanga bush, stood him up beside a hastily dug grave and shot him. His rule as Africa's first democratically elected leader had lasted ten weeks. More than fifty years later the murky circumstances and tragic symbolism of Lumumba's assassination still trouble many people around the world. Emmanuel Gerard and Bruce Kuklick pursue events through a web of international politics revealing a tangled history in which many people black and white well meaning and ruthless African, European and American bear responsibility for this crime.

Writing the Wrongs Elizabeth Faue, 2018-05-31 Eva McDonald Valesh was one of the Progressive Era's foremost labor publicists. Challenging the narrow confines placed on women, Valesh became a successful investigative journalist, organizer and public speaker for labor reform. Valesh was a compatriot of the labor leaders of her day and the right hand man of Samuel Gompers, president of the American Federation of Labor. Events she covered during her colorful unconventional reporting career included the Populist revolt, the Cuban crisis of the 1890s and the 1910 Shirtwaistmakers uprising. She was described as bright even comet like by her admirers but her enemies saw her as a pest who took all the benefit that her sex controls when in argument with a man. Elizabeth Faue examines the pivotal events that transformed this outspoken daughter of a working class Scots Irish family into a national political figure, interweaving the study of one woman's fascinating life with insightful analysis of the changing character of American labor reform during the period from 1880 to 1920. In her journey through the worlds of labor

journalism and politics Faue lays bare the underside of social reform and reveals how front line workers in labor s political culture reporters investigators and lecturers provoked and informed American society by writing about social wrongs Compelling insightful and at times humorous Writing the Wrongs is a window on the Progressive Era on social history and the new journalism and on women s lives and the meanings of class and gender

US Power and the Internet in International Relations M. Carr,2016-04-08 Despite the pervasiveness of the Internet and its importance to a wide range of state functions we still have little understanding of its implications in the context of International Relations Combining the Philosophy of Technology with IR theories of power this study explores state power in the information age

Dissenting Voices in America's Rise to Power David Mayers,2007-02-15 This book offers a major rereading of US foreign policy from Thomas Jefferson s purchase of Louisiana expanse to the Korean War This period of one hundred and fifty years saw the expansion of the United States from fragile republic to transcontinental giant David Mayers explores the dissenting voices which accompanied this dramatic ascent focusing on dissenters within the political and military establishment and on the recurrent patterns of dissent that have transcended particular policies and crises The most stubborn of these sprang from anxiety over the material and political costs of empire while other strands of dissent have been rooted in ideas of exigent justice realpolitik and moral duties existing beyond borders Such dissent is evident again in the contemporary world when the US occupies the position of preeminent global power Professor Mayers s study reminds us that America s path to power was not as straightforward as it might now seem
