work to narrow the focus of news reporting removing necessary context in the process By examining how news stories are actually produced Pedelty highlights the elusiveness of the goal of objective journalism We see how the biases of war correspondents are connected to structures of power and how these biases affect actual journalistic practices Pedelty also explores alternative possibilities for war reporting including emerging alternative international news services and ways to deepen reporters understandings of the countries and problems they cover Influenced by anthropology communication studies cultural studies and sociology this book will interest scholars and students in those fields as well as journalists and anyone who watches reads or listens to news
