a drawback is central to the subject's enduring interest Handbook of Autobiography / Autofiction Martina Wagner-Egelhaaf, 2019-01-29 Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as e.g. the relation between literature and reality, truth and fiction, the dependency of author, narrator and figure or issues of individual and cultural styles etc. can be studied preeminently in the autobiographical genre. Yet the tradition of life writing has in the course of literary history developed manifold types and forms. Especially in the globalized age where the media and other technological cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained even enhanced its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers. *Memoirs of Well-Being* Tanja Reiffenrath, 2016-05-15 As the body politics of life writing in the United States change, illness and disability memoirs receive considerable attention. Although these narratives are framed by a lack of health, they abundantly present health and do so beyond its binary relationship to the pathological. This book departs from previous scholarship by bringing into focus the writers' representations of cure, recovery and healing as well as their reluctance to bring closure to their narratives and align their stories with traditional notions of health. These memoirs thus partake in the construction of alternative narratives of illness and disability.
