My Friend Wants To Run Away:

My Name is Runaway Jessica Shubert, 2019-05-24 It's day 2 of the extermination of the worst criminals in Tersatellus and things aren't looking much easier for anyone involved Temporarily exiled in Hudson Bay the criminals in question have to deal with all sorts of cultural divides from language barriers to locals trying to kill them not to mention the wildlife trying to eat them and automobile malfunctions trying to fry them And that's just when the two established gangs aren't fighting Well technically only two When new participants turn out to be old friends interested in a treasonous alliance Rat manages to find herself in even deeper trouble which is impressive for someone who started her Monday blowing up an island and being revealed as one of the greatest saboteurs of her country's history With her own past unravelling beyond her control and her future turning less certain by the hour this longtime fugitive of the law has to figure out where her loyalties lie and what things she can't escape from

Cognitive Self Change Jack Bush, Daryl M. Harris, Richard J. Parker, 2016-04-05
COGNITIVE SELF CHANGE The consensus amongst the leading researchers in the offender treatment area is that the comprehensive and sophisticated clinical methods the authors have derived for offender treatment are unsurpassed Indeed they have formed the basis for what is known as the core correctional practices for reducing anti social behavior Paul Gendreau Professor Emeritus University of New Brunswick Bush and colleagues phenomenologically based approach to offender rehabilitation is based explicitly on the stories they have collected from prisoners and probationers and is a welcome contribution to an academic literature that too often obfuscates the actual work involved in delivering help to the hardest to reach in the criminal justice system Shadd Maruna Ph D Dean of the Rutgers School of Criminal Justice Cognitive Self Change presents a practical guide to rehabilitation based on understanding the way individual offenders experience themselves and the world around them at the moment they offend De incentivizing criminal behavior and replacing it with self empowered change are the keys to upending the traditionally antagonistic relationship between criminals and those meant to help them change The authors with their experience of working with offenders and implementing rehabilitation programs have drawn together clinical and academic perspectives on the treatment of high risk offenders analyzing current approaches to treatment and the problems encountered in their application Cognitive Self Change rejects the traditional dichotomy of control versus treatment devising instead a strategy that integrates both Focusing on high risk and hard core offenders not just those that are ready to change they discuss why offenders offend why they are seldom motivated to change and why they often fail to engage in treatment This leads to a strategy of communication that teaches offenders a set of skills they can use to change themselves and that motivates them to do so
