Pythagoras and the Early Pythagoreans Leonid Zhmud, 2012-05-31 Pythagoras c 570 c 495 BC arguably the most influential thinker among the Presocratics emerges in ancient tradition as a wise teacher an outstanding mathematician an influential politician and as a religious and ethical reformer He claimed to possess supernatural powers and was the kind of personality who attracted legends In contrast to his controversial and elusive nature the early Pythagoreans such as the doctors Democedes and Alcmaeon the Olympic victors Milon and Iccus the botanist Menestor the natural philosopher Hippon and the mathematicians Hippasus and Theodorus all appear in our sources as rational as they can possibly be It was this normality that ensured the continued existence of Pythagoreanism as a philosophical and scientific school till c 350 BC This volume offers a comprehensive study of Pythagoras and the early Pythagoreans through an analysis of the many representations of the Teacher and his followers allowing the representations to complement and critique each other Relying predominantly on sources dating back to before 300 BC Zhmud portrays a more historical picture of Pythagoras of the society founded by him and of its religion than is known from the late antique biographies In chapters devoted to mathematical and natural sciences cultivated by the Pythagoreans and to their philosophies a critical distinction is made between the theories of individual figures and a generalized all Pythagorean teaching which is known from Aristotle **Companion to the Hellenistic World** Andrew Erskine, 2009-02-09 Covering the period from the death of Alexander the Great to the celebrated defeat of Antony and Cleopatra at the hands of Augustus this authoritative Companion explores the world that Alexander created but did not live to see Comprises 29 original essays by leading international scholars Essential reading for courses on Hellenistic history Combines narrative and thematic approaches to the period Draws on the very latest research Covers a broad range of topics spanning political religious social economic and cultural history The **Coffin of Hegata** Harco Willems, 1996 The coffin published in this book represents a type that had some popularity in southern Upper Egypt in the early Middle Kingdom but which despite its extraordinary decoration had not attracted attention

so far The most striking feature of the decoration is that the object friezes the pictorial rendering of ritual implements usually found on coffin interiors of the period also include complete ritual scenes some of which are attested only here Apart from this the decoration includes an extensive selection of the religious texts know as the Coffin Texts The author first studies the archaeological context and dating of the coffin and attempts a reconstruction of the construction procedures from his technical description of the monument The detailed account of the decoration in the rest of the book interprets the ritual iconography and offers fresh translations and interpretations of the Coffin Texts A methodological innovation is that he regards the scenes and texts not as individual decoration elements but as components of an integral composition The background of this composition is argued to be a view of life in the hereafter in which the deceased is involved in an unending cycle of ritual action which reflects the funerary rituals that were actually performed on earth On the one hand these netherworldly rituals aim at bringing the deceased to new life by mummification on the other the newly regenerated deceased partakes in embalming rituals for gods representing his dead father Osiris or Atum These gods in their turn effectuate the deceased s regeneration. The entire process results in a cycle of resuscitation in which the afterlife of the deceased and of the father gods are interdependent. The sociological bias of this interpretation with its emphasis on kinship relations differs significantly from earlier attempts to explain Egyptian funerary religion The Books of Kings André Lemaire, Baruch Halpern, Matthew Joel Adams, 2010 This collaborative commentary on or dictionary of Kings explores cross cutting aspects of Kings ranging from the analysis of its composition historically regarded to its transmission and reception Ample attention is accorded sources figures and peoples who play a part in the book The commentary deals with Kings treatment in translation and role in later ancient literature While our comments do not proceed verse by verse the volume furnishes quidance from contributors highly qualified to advance contemporary discussion on the book s historical background its literary intentions and characteristics and on themes and motifs central to its understanding both of itself and of the world from which it arose This volume functions as a meta commentary offering windows into the secondary literature but assembling data more fully than is the case in individual commentaries Foundations of Power and Conflicts of Authority in Late-antique Monasticism Alberto Camplani, Giovanni Filoramo, 2007 The volume offers the acts of a meeting held at the University of Turin on the foundations of power and the conflicts of authority as documented by the monastic sources of East and West in Late Antiquity with special reference to Max Weber's analysis of these notions The issue is here examined from a variety of perspectives the different meanings of power and authority in ancient monastic sources the criteria by which authority is established within the monastic organizations the kind of power and authority exercised towards outsiders the relationship between monks and other authorities especially the Church the monks and their economic activity the strategies for the solution of conflicts The wide range of historical and cultural problems raised by these questions is what the present volume tries to illuminate through individual studies of a number of specific phenomena events
