Prospect Of Liberal Democracy:

A Prospect of Liberal Democracy William S. Livingston, 1979 **A Prospect of Liberal Democracy** William S. Livingston, 1979 The Prospects for Liberal Nationalism in Post-Leninist States Cheng Chen, 2010-11-01 **Prospects for Green Liberal Democracy** Sverker C. Jagers, 2007 Both eco authoritarian and democratic scholars have claimed that a liberal democracy cannot pay due attention to the environment However such claims call for profound analysis Jagers argues that much in the debate on liberal democracy and environmental concern can be more stringently elaborated For instance there has been a tendency to compound philosophical and institutional objections against liberal democracy Often it is unclear what the critical voices actually mean when they speak of liberal democracy In addition the compatibility between specific forms of liberal democracy and sustainable development has not been thoroughly investigated Most studies have been limited to comparing liberal and ecological values or ecological values and liberal institutions To avoid many of these shortcomings this study analyzes the compatibility between sustainable development policies and liberal democracy by combining political theory and resource scenarios based on environmental science **The Prospects of Liberalism** Timothy Fuller, 1984 *Totalitarianism and the Prospects for World Order* Alexander Shtromas, 2003-01-01 A remarkably prescient thinker Aleksandras Shtromas devoted his life to understanding totalitarianism and political change This posthumous collection of writings edited by Robert Faulkner and Daniel J Mahoney addresses some of the topics that preoccupied Shtromas throughout his life including totalitarian regimes postcommunist transitions the fates of the Baltic states and the nature of political revolutions *Democratization in Africa: Challenges and Prospects* Gordon Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of Democratization **Prospects for Constitutionalism in Post-Communist Countries** Levent Gönenç, 2002-06-18 The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR Most of these countries

made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy Adding to the latter a number of national entities gained their independence after the disintegration of the federative states of the USSR Yugoslavia and Czechoslovakia Many recent studies have focused on these double in some cases triple transitions and scholars from different fields analyzed the so called 1989 Revolution from different perspectives Rather less scholarly attention has been paid to the future of post communist constitutions and prospects for constitutionalism in these countries The main questions dealt with throughout this study can be formulated as follows Will liberal democratic constitutionalism take root in these countries Will new constitutions in Eastern Europe and the former USSR perish or survive This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general Such constitutional change is not only on the East European but also on the West European agenda The purpose of this study is not to introduce a general theory about constitutional in stability but studying post communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective

Confucianism's Prospects Shaun O'Dwyer,2019-08-01 Challenges descriptions of East Asian societies as Confucian cultures and critically evaluates communitarian Confucian alternatives to liberal democracy In Confucianism s Prospects Shaun O Dwyer offers a rare critical engagement with English language scholarship on Confucianism Against the background of historical and sociological research into the rapid modernization of East Asian societies O Dwyer reviews several key Confucian ethical ideas and proposals for East Asian alternatives to liberal democracy that have emerged from this scholarship He also puts the following question to Confucian scholars what prospects do those ideas and proposals have in East Asian societies in which liberal democracy and pluralism are well established and individualization and declining fertility are impacting deeply upon family life In making his case O Dwyer draws upon the neglected work of Japanese philosophers and intellectuals who were witnesses to Japan s pioneering East Asian modernization and protagonists in the rise and disastrous wartime fall of its own modernized Confucianism He contests a sometimes Sinocentric and ahistorical conception of East Asian societies as Confucian societies while also recognizing that Confucian traditions can contribute importantly to global philosophical

dialogue and to civic and religious life This book makes a significant contribution to the field by analyzing a number of claims of modern Confucianism from a critical philosophical perspective Kiri Paramore author of *Japanese Confucianism A Cultural History* *Climate Crisis and the Democratic Prospect* Frank Fischer, 2017-05-26 Can contemporary democratic governments tackle climate crisis Some argue that democracy has to be a central part of a strategy to deal with climate change Others argue that experience shows it not to be up to the challenge in the time frame available that it will require a stronger hand even a form of eco authoritarianism A question that does not lend itself to an easy assessment this volume seeks to out and assess the competing answers While the book supports the case for environmental democracy it argues that establishing and sustaining democratic practices will be difficult during the global climate turmoil ahead especially in the face of state of emergencies This inquiry undertakes a search for an appropriate political ecological strategy for preserving a measure of democratic governance during hard times Without ignoring the global dimensions of the crisis the analysis finds an alternative path in the theory and practices participatory environmental governance embodied in a growing relocalization movement and global eco localism generally Although such movements largely operate under the radar of the social sciences the media and the political realm generally these vibrant socio ecological movements not only speak to the crisis ahead but are already well established and thriving on the ground including ecovillages eco communes eco neighborhoods and local transition initiatives With the help of these ideas and projects the task is to influence the discourse of environmental political theory in ways that can be of assistance to those who will face climate crisis in its full magnitude *The Political Prospects of a Sustainability Transformation* Daniel Hausknost, Marit Hammond, 2021-06-14 Half a century ago many democratic states started to respond to environmental pressures that had arisen in the wake of rapid industrialization They set up environmental ministries and agencies and issued legislation to control the pollution of air and water and to manage industrial processes wastes and toxic substances This was the birth of the environmental state With planetary ecological challenges like climate change spiraling out of control and dwarfing the environmental state s classical tasks of environmental management new questions about the transformative capacities of the state are becoming acute today How large is the state s capability to transform enhanced industrial societies into sustainable post carbon societies Do its new environmental functions empower the state to prioritise ecological goals over economic growth Can the state s environmental management capabilities be radicalised to turn it into a sustainability state Can democracies be enhanced to enlarge the state s transformative capacities *The Political Prospects of a Sustainability Transformation Moving Beyond the Environmental State* explores these and other questions from a variety of theoretical and empirical angles covering the fields of democratic theory theories of the state political economy political sociology rhetoric and political philosophy The chapters in this book were originally published as a special issue of the journal *Environmental Politics* *National Identity and Democratic Prospects in Socialist China* Edward Friedman, 2016-09-16 This analysis of every facet of a national identity makes it less

likely that the next great explosion in the Communist world and its consequences will come as a surprise It investigates tendencies in China that might lead it down the same path as Russia and Yugoslavia

Prospects for a Common Morality Gene Outka, John P. Reeder, 1992-11-17 This volume centers on debates about how far moral judgments bind across traditions and epochs Nowadays such debates appear especially volatile both in popular culture and intellectual discourse although there is increasing agreement that the moral and political criteria invoked in human rights documents possess cross cultural force many modern and postmodern developments erode confidence in moral appeals that go beyond a local consensus or apply outside a particular community Often the point of departure for discussion is the Enlightenment paradigm of a common morality in which it is assumed that certain unchanging beliefs inhere in the structure of human reason Whereas some thinkers continue to defend this paradigm others modify it in diverse ways without abandoning entirely the attempt to address a universal audience and still others jettison virtually all of its distinguishing features Exhibiting a range of positions Western participants take in these debates this volume seeks to advance the substance of the debates themselves without prejudging the outcome Rival assessments of the Enlightenment paradigm are offered from various philosophical and theological points of view In addition to the editors the contributors include Robert Merrihew Adams Annette C Baier Alan Donagan Margaret A Farley Alan Gewirth David Little Richard Rorty Jeffrey Stout and Lee H Yearley

Prospects for Democratic Consolidation in East-Central Europe Geoffrey Pridham, Attila Ágh, 2001 Picturing home examines the depiction of domestic life in British feature films made and released in the 1940s It explores how pictorial representations of home onscreen in this period reimagined modes of address that had been used during the interwar years to promote ideas about domestic modernity Picturing home provides a close analysis of domestic life as constructed in eight films contextualising them in relation to a broader offscreen culture surrounding the suburban home
