Definitions of Art Stephen Davies, 2018-08-06 In the last thirty years work in analytic philosophy of art has flourished and it has given rise to considerably controversy Stephen Davies describes and analyzes the definition of art as it has been discussed in Anglo American philosophy during this period and in the process introduces his own perspective on ways in which we should reorient our thinking Davies conceives of the debate as revealing two basic conflicting approaches the functional and the procedural to the questions of whether art can be defined and if so how As the author sees it the functionalist believes that an object is a work of art only if it performs a particular function usually that of providing a rewarding aesthetic experience By contrast the proceduralist believes that something is an artwork only if it has been created according to certain rules and procedures Davies attempts to demonstrate the fruitfulness of viewing the debate in terms of this framework and he develops new arguments against both points of view although he is more critical of functional than of procedural definitions Because it has generated so much of the recent literature Davies starts his analysis with a discussion of Morris Weitz's seminal paper The Role of Theory in Aesthetics He goes on to examine other important works by Arthur Danto George Dickie and Ben Tilghman and develops in his critiques original arguments on such matters of the artificiality of artworks and the relevance of artists intentions

Metaphyscial Symbols in Brand Communication Oya AYAN,2023-09-05 This thesis brings together three topics that we want to search brand communication gastronomy metaphysics After completing my master s degree in marketing communications what I always had in mind was the new trends in advertising communication with the globalization of the 21st century In the design of the advertisement not only the use of elements in communication technologies but also the philosophical background in its fabric attracted my attention In this context I began to sense that there might be mythological approaches in the chemistry of advertising messages that gained importance in social media In the postmodern environment of the 21st century food nutrition culinary arts and to put it briefly gastronomy became the dominant language of communication Moreover it caused kitchen wars by becoming politicized In line with my interest in gastronomy I wanted to focus on food advertisements I started to ask myself to what extent the fast food trend that marked the 21st century was changing the Global Society Interestingly I started to observe that there were metaphysical images that were reflected from

ancient wisdom to the present day in McDonald s brand communication This problem which has not been studied much yet was an important exercise for me in terms of analyzing the Global Society as a doctoral thesis I can say that doing the analysis in the light of semiology as a method has broadened my horizon by directing me to an interdisciplinary perspective I would like to acknowledge Communication Sciences and the Internet Institute which allowed me to make such a significant study Prof Dr Mete amdereli who supported me with great excitement in all phases of my thesis Prof Dr Emine Yava gel who made great contributions to deepen my research subjects in the monitoring of the thesis In addition I would like to thank Prof Dr Mim Kemal ke from whose suggestions I benefited in the historical context I am also indebted to my colleagues and friends especially my family who buoyed me up and supported me during the research and writing process of my thesis which lasted more than 2 years I hope this study will be useful and inspire new studies in this field
