Prosthetic Impulse:

The Prosthetic Impulse Marquard Smith, Joanne Morra, 2006 Where does the body end Exploring the material and metaphorical borderline between flesh and its accompanying technologies *Prosthetic Body Parts in Nineteenth-Century Literature and Culture* Ryan Sweet, 2021-12-03 This open access book investigates imaginaries of artificial limbs eyes hair and teeth in British and American literary and cultural sources from the nineteenth and early twentieth century Prosthetic Body Parts in Nineteenth Century Literature and Culture shows how depictions of prostheses complicated the contemporary bodily status quo which increasingly demanded an appearance of physical wholeness Revealing how representations of the prostheticized body were inflected significantly by factors such as social class gender and age Prosthetic Body Parts in Nineteenth Century Literature and Culture argues that nineteenth century prosthesis narratives though presented in a predominantly ableist and sometimes disablist manner challenged the dominance of physical completeness as they questioned the logic of prostheticization or presented non normative subjects in threateningly powerful ways Considering texts by authors including Charles Dickens Edgar Allan Poe and Arthur Conan Doyle alongside various cultural medical and commercial materials this book provides an important reappraisal of historical attitudes to not only prostheses but also concepts of physical normalcy and difference *The Prosthetic Pedagogy of Art* Charles R. Garoian, 2013-02-01 Uses autobiographical and cultural narratives related to art research and practice to explore experiment and improvise multiple correspondences between and among learners own lived experiences and understandings and those of others *Making Media Theory* Marcel O'Gorman, 2020-10-29 Making Media Theory is about the study practice and hands on design of media theory It looks at experimental research methods and engages in media analysis inviting readers to respond to and shape the materiality of media while carefully considering the implications of living in a technoculture The author walks readers through the creation of digital objects to think with where critical design practices serve as tools for exploring social and philosophical issues related to technological being and becoming *Experimental Fashion* Francesca Granata, 2017-02-23 Shortlisted for the Millia Davenport Publication Award Experimental Fashion traces the proliferation of the grotesque and carnivalesque within contemporary fashion and the close relation between fashion and performance art from Lady Gaga s raw meat dress to Leigh Bowery s performance style The book examines the designers and performance artists at the turn of the twenty first century whose work challenges established codes of what represents the fashionable body These innovative people the book argues make their challenges through dynamic strategies of parody humour and inversion It explores the experimental work of modern designers such as Georgina Godley Bernhard Willhelm Rei Kawakubo and fashion designer performance artist and club figure Leigh Bowery It also discusses the increased centrality of experimental fashion through the pop phenomenon Lady Gaga *Envisioning Voice and the Aphasic Ears* D Venkat Rao, 2025-04-30 This book explores the possibility of using Sanskrit as a basis for rethinking human thought and reflection challenging the dominance of European

intellectual traditions Sanskrit with its vast historical spread across Central South and Southeast Asia as well as Europe offers a unique reflective idiom that contrasts with the European conceptual frameworks that still dominate contemporary thinking in areas such as language art reason justice and politics The book argues that European thinkers despite acknowledging a shared linguistic root with Sanskrit Indo European have followed a very different intellectual path one that has historically been violent and continues to fuel contemporary conflicts In contrast Sanskrit s long history of coexistence with diverse languages cultures and polities offers alternative possibilities for understanding justice and coexistence in today s globalized world By comparing the reflective traditions of Sanskrit with European philosophical and linguistic categories the book seeks to demonstrate how Sanskrit offers a more inclusive less confrontational model for engaging with the world The book engages with Sanskrit texts European philosophers and language theorists to substantiate its claims It argues that such a cross cultural examination which brings together the reflective traditions of both heritages is necessary for a new kind of intellectual inquiry one that moves beyond the entrenched paradigms of European thought and opens up new possibilities for coexistence and understanding

Walter, Margaret Healy, 2018-12-07 Prosthesis denotes a rhetorical addition to a pre-existing beginning a replacement for that which is defective or absent a technological mode of correction that reveals a history of corporeal and psychic discontent Recent scholarship has given weight to these multiple meanings of prosthesis as tools of analysis for literary and cultural criticism The study of pre-modern prosthesis however often registers as an absence in contemporary critical discourse This collection seeks to redress this omission reconsidering the history of prosthesis and its implications for contemporary critical responses to and uses of it The book demonstrates the significance of notions of prosthesis in medieval and early modern theological debate Reformation controversy and medical discourse and practice It also tracks its importance for imaginings of community and of the relationship of self and other as performed on the stage expressed in poetry charms exemplary and devotional literature and as fought over in the documents of religious and cultural change Interdisciplinary in nature the book engages with contemporary critical and cultural theory and philosophy genre theory literary history disability studies and medical humanities establishing prosthesis as a richly productive analytical tool in the pre-modern as well as the modern context This book was originally published as a special issue of the Textual Practice journal

The Replaceability Paradigm Niall Martin, Ilios Willems, 2024-06-04 The trope of humans being replaced by AI is one of the most familiar examples of the rhetoric of replaceability Not only have questions about what is unique and what is replaceable gained momentum in digital culture but notions of fungibility have emerged in many other contexts as well such as ecology management theory and more sinisterly in racist and conspiracist thinking This volume argues that there is a replaceability paradigm at work throughout the culture of modernity from the European Renaissance through Freudian psychoanalysis Chinese science fiction and postcolonial theory all the way to neural network programs such as Google's DeepDream This collection will be of interest to
