Alternative Protein Source For A Sustainable And Healthy Nutrition Carla Cavallo, Kathleen L. Hefferon, 2024-08-01 Global socioeconomic systems and climate change exacerbate disparities that leave a huge proportion of the human population malnourished This condition will be further worsened by intensive food production like livestock that produces affordable protein but contribute to increasing greenhouse gases making conventional food sources such as animal livestock unsustainable at global scales in a vicious cycle Thus food systems have come under pressure to meet global food demands whilst having to meet economic and ecological targets The Ash and Protein Factor in Poultry Feeding Harry Reynolds Lewis, 1913

Amino Acid Composition and Biological Value of Cereal Proteins Radomir Láztity, Máté Hidvegi, 2012-12-06 Cereals belong to the most important elements in the history of mankind From the beginning of agriculture cereals have been by far the most important staple food in the world Although the cereal consumption decreased to a low level in the developed countries in Europe and North America in the developing countries over two thirds of the calorie and protein intake is based on cereals A substantial quantity of cereals goes indirectly into food via feed to animals Generally cereal proteins are classified as proteins of lower biological value because of shortage in lysine and some other essential amino acids Recent developments in the determination and evaluation of the biological value of proteins and protein mixtures suggest that the oversimplified earlier evaluation of cereal proteins must be reviewed This book contains the edited proceedings of the International Symposium on Amino Acid Composition and Biological Value of Cereal Proteins held in Budapest Hungary May 31 June 1 1983 under the sponsorship of the International Association for Cereal Chemistry Hungarian Scientific Society for Food Industry and Grain Trust Hungary with supplemental invited contributions Scientists biologist plant breeders farmers chemists biochemists engineers food technologists and nutritionists from 17 countries presented and reviewed along with participants from 20 countries the recent methodology and trends in the determination of the biological value of cereal proteins v the amino acid composition of cereal proteins and factors influencing the composition and the role of cereal proteins in nutrition and animal feeding
