Protecting Patients Rights A Comparative Study Of The Ombudsman In Healthcare:

Protecting Patients' Rights? Stephen Mackenney, Lars Fallberg, 2004 Ombudsman has been adopted in a number of countries over the years as a term for an administrative system that aims to protect the interests of individuals who complain against the system. However, this protection varies considerably from country to country. With an eminent list of international contributors, this book provides an overview of the role of the Ombudsman in relation to healthcare in countries with substantial cultural and historical differences. It demonstrates practical ways to protect patients' rights, looking at how each system operates, identifying the best components from each, as well as proposing future reforms. All healthcare professionals, including policy makers and shapers, will find this essential reading, gaining valuable lessons and insights to incorporate into their own organisations and systems. Family and Succession Law in Finland Tuulikki Mikkola, 2022-09-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this concise exposition and analysis of the essential elements of law with regard to family relations, marital property and succession to estates in Finland covers the legal rules and customs pertaining to the intertwined civic status of persons, the family and property. After an informative general introduction, the book proceeds to an in-depth discussion of the sources and instruments of family and succession law, the authorities that adjudicate and administer the laws and issues surrounding the person as a legal entity and the legal disposition of property among family members. Such matters as nationality, domicile and residence, marriage, divorce and cohabitation, adoption and guardianship, succession and inter vivos arrangements and the acquisition and administration of estates are all treated to a degree of depth that will prove useful in nearly any situation likely to arise in legal practice. The book is primarily designed to assist lawyers who find themselves having to apply rules of international private law or otherwise handling cases connected with Finland. It will also be of great value to students and practitioners as a quick guide and easy-to-use practical resource in the field and especially to academicians and researchers engaged in comparative studies by providing the necessary basic material of family and succession law.

International Medical Malpractice Law Dieter Giesen, 1988-09 This monograph is the most comprehensive comparative law study of legal responsibility arising from medical care presently available. It is written for doctors as well as health care administrators and legal professionals. Focusing on the problems of civil liability, it presents the development points of contact with and differences between the modern law of medical liability stemming from both the Common Law and Civil Law traditions of England, Scotland, Eire, New Zealand, Australia, Canada, the United States, South Africa, France, Belgium, West Germany, Switzerland, and Austria. It demonstrates the extent to which both problems of medical law and trends towards their solution are already familiar in these legal systems. The work describes principles and trends not by confronting the reader with national reports and separate chapters on different legal systems; rather, the relevant legal problems are analyzed from an integrative comparative viewpoint. The main thrust of the presentation is the analysis of numerous court decisions, the number of which is rising ominously in the United States, on the civil liability of doctors and hospitals for damages arising from substandard treatment or inadequate disclosure of information to the patient. References to the legal and medical literature, indexes, and a refined system of cross references together with an important collection of appendices covering legal and ethical declarations make this work accessible as a handbook and reference work for the legal and social problems encountered today in the wide area of law, ethics, and medicine.

The Proceedings of the 18th Annual History of Medicine Days Conference 2009 Aleksandra Loewenau, Kerry Sun, 2011-12-08 This volume is the first one in a peer reviewed series of Proceedings Volumes from the Calgary History of Medicine Days conferences which are now produced with Cambridge Scholars Publishing. The History of Medicine Days are two day Nation wide conferences held annually in spring at the University of Calgary, Canada, where undergraduate and early graduate students from across Canada, the United States, United Kingdom, and Europe give paper and poster presentations on a wide variety of topics from the history of medicine and health care. The selected 2009 conference papers that are assembled in this volume particularly comprise the history of Ancient Medicine, Canadiana, Eugenics, Military Medicine, Public Health, Surgery, Diseases, as well as Sex and Gender perspectives. Distinguished Professor of Biology and Chair of the History of Biology Program at Washington University in St. Louis, USA, Dr. Garland E. Allen held the 2009 keynote address at the conference. His topic, "Evolution, Genetics, and Eugenics: The Misuse of Biological Theory, 1900-1945," was largely based on an earlier article in the scholarly journal *Endeavour*. With the permission of the author and editors in chief of *Endeavour*, this article could be reprinted in the current volume where it represents the 2009 keynote address. This volume also includes the abstracts of all 2009 conference presentations and is well illustrated with diagrams and images pertaining to the history of medicine.
