**Protecting Participants and Facilitating Social and Behavioral Sciences Research** National Research Council, Division on Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on National Statistics, Panel on Institutional Review Boards, Surveys, and Social Science Research, 2003-07-26 Institutional review boards IRBs are the linchpins of the protection systems that govern human participation in research. In recent years high profile cases have focused attention on the weaknesses of the procedures for protecting participants in medical research. The issues surrounding participants protection in the social behavioral and economic sciences may be less visible to the public eye but they are no less important in ensuring ethical and responsible research. This report examines three key issues related to human participation in social behavioral and economic sciences research: 1 obtaining informed voluntary consent from prospective participants 2 guaranteeing the confidentiality of information collected from participants which is a particularly challenging problem in social sciences research and 3 using appropriate review procedures for minimal risk research. Protecting Participants and Facilitating Social and Behavioral Sciences Research will be important to policy makers, research administrators, research sponsors, IRB members and investigators. More generally it contains important information for all who want to ensure the best protection for participants and researchers alike in the social behavioral and economic sciences. *The SAGE Handbook of Applied Social Research Methods* Leonard Bickman, Debra J. Rog, 2009 This Handbook addresses the methodology of social science research and the appropriate use of different methods. **The SAGE Encyclopedia of Industrial and Organizational Psychology** Steven G. Rogelberg, 2016-09-27 The well received first edition of the Encyclopedia of Industrial and Organizational Psychology 2007 2 vols established itself in the academic library market as a landmark reference that presents a thorough overview of this cross disciplinary field for students, researchers and professionals in the areas of psychology, business management and human resources. Nearly ten years later SAGE presents a thorough revision that both updates current entries and expands the overall coverage adding approximately 200 new articles expanding from two volumes to four. Examining key themes and topics from within this dynamic and expanding field of psychology this work offers a truly cross cultural and global perspective. **Ethical Issues in Clinical Research** Bernard Lo, 2012-03-28 This book teaches researchers how to resolve the ethical dilemmas that can arise at any stage in clinical research. In addition to explaining pertinent regulations and laws Dr Lo helps investigators understand the gaps and uncertainties in regulations as well as situations in which merely complying with the law may not fulfill ethical responsibilities. Most chapters include real life examples that the author walks through discussing the salient issues and how to approach them. This book can be used in courses on research ethics that are required or encouraged by major National Institutes of Health grants in academic health centers. **Overseas Research** Christopher B.
