Protection of Aquatic Biodiversity, 1995 Protection of Aquatic Biodiversity David P. Philipp, 1995 A proceedings volume based on the World Fisheries Congress held in Athens Greece in 1992 this book includes the following topics protection of aquatic biodiversity will we meet the challenge and a common conservation ethic communicating the way towards protection **Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity** Timothy G. O'Higgins, 2020 Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats providing a wide variety of benefits to human beings Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures including pollution contamination invasive species overfishing and climate change Such pressures threaten the sustainability of these ecosystems their provision of ecosystem services and ultimately human well being Ecosystem based management EBM is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision making This open access book introduces the essential concepts and principles required to implement ecosystem based management detailing tools and techniques and describing the application of these concepts and tools to a broad range of aquatic ecosystems from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta , Regional Dialogue on Biodiversity Mainstreaming across Agricultural Sectors in the Asia and the Pacific Region Food and Agriculture Organization of the United Nations, 2021-07-07 This report concisely introduces FAO's work on biodiversity mainstreaming including the regional consultations on the subject that took place in 2018 and 2019 It particularly focuses on the Regional Dialogue on Biodiversity Mainstreaming across Agricultural Sectors in Asia and the Pacific held in Bangkok Thailand in July 2019 It outlines the main topics addressed in its opening plenary thematic and closing sessions and highlights the most relevant regional needs priorities and recommendations identified by the meeting participants **The State of the World's Aquatic Genetic Resources for Food and Agriculture** Food and Agriculture Organization of the United Nations, 2019-07-24 The conservation sustainable use and development of aquatic genetic resources AqGR is critical to the future supply of fish The State of the World's Aquatic Genetic Resources for Food and Agriculture is the first ever global assessment of these resources with the scope of this first Report being limited to cultured AqGR and their wild relatives within national jurisdiction The Report draws on 92 reports from FAO member countries and five specially commissioned thematic background studies The reporting countries are responsible for 96 percent of global aquaculture production The Report sets the context with a review of the state of world's aquaculture and fisheries and includes overviews of the uses and exchanges of AqGR the drivers and trends impacting AqGR and the extent of ex situ and in situ conservation efforts The Report also investigates the roles of stakeholders in AqGR and the levels of activity in research education training and

extension and reviews national policies and the levels of regional and international cooperation on AqGR. Finally, needs and challenges are assessed in the context of the findings from the data collected from the countries. The Report represents a snapshot of the present status of AqGR and forms a valuable technical reference document, particularly where it presents standardized key terminology and concepts.

Sustainable Management of Fish Genetic Resources Uttam Kumar Sarkar, T. T. Ajith Kumar, Neeraj Sood, Rajeev Kumar Singh, Ravindra Kumar, Lalit Kumar Tyagi, 2024-10-12. This book explores fish genetic resources while emphasizing the importance of genetic diversity for the sustainability of global fish populations. Amidst challenges like overfishing and climate change, preserving fish genetic resources is vital. This book acts as a resource guide and provides an overview of fish genetics, conservation challenges, and sustainable strategies. This work is a call to action aiming to bridge scientific research with practical application, guiding readers towards sustainable management of fish genetic wealth. It also contains several case studies that highlight the successes and lessons from past conservation efforts. The promotion of sustainable practices also advocates for holistic strategies benefiting the environment and human communities. The technological insights covered in the book introduce the latest fish genetics research and its conservation applications. It also addresses the national and international frameworks for fish genetic resource conservation. This book covers educational tools designed for students, researchers, professionals, and policy makers in advanced aquatic biology and fisheries management.

Managing California's Water Ellen Hanak, 2011. *The role of aquaculture in the implementation of the Convention on Biological Diversity's Kunming-Montreal Global Biodiversity Framework* Bowser, L.; Himes-Cornell, A.; Buonfrate, C.; Behar, I., This technical paper summarizes how the aquaculture sector contributes to the vision, goals, and targets of the Kunming-Montreal Global Biodiversity Framework (KMGBF) with a view to ensuring that sustainable aquaculture systems and practices are not overlooked in efforts to achieve the KMGBF targets. It does so by illustrating a more nuanced and complex relationship between aquaculture and biodiversity than that which is often conveyed and understood in the public sphere. The paper then reviews the key risks to biodiversity from poor aquaculture practices and management, as well as the key positive effects on biodiversity from sustainable aquaculture practices and management. These risks and positive effects demonstrate where aquaculture is most strongly linked to the KMGBF and help to identify areas where aquaculture promotes its goals and targets. Key principle of the KMGBF is the need for a whole of society and whole of government approach to its implementation. This document serves to inform, engage, encourage, and empower stakeholders who are interested in advancing the sustainable use and conservation of biodiversity within aquatic systems. It aims to broaden the conversation on biodiversity to include sustainable use sectors that are not typically involved in this case, aquaculture, so they may be recognized as relevant and important to engage with. Importantly, this document refrains from endorsing any specific stance on the KMGBF, recognizing that the diverse opportunities for action outlined across the KMGBF targets must be seen in context. Nevertheless, it intends to showcase that aquaculture, particularly sustainable aquaculture,

possesses the potential to effect positive change **Impact of Dam on Fish in the Rivers of Nepal** Asian Development Bank,2018-12-01 This study was conducted by the Asian Development Bank to assess the impact of projects involving the construction of dams on aquatic biodiversity in Nepal The findings may not be authoritative but conclusions suggest that fish populations and the diversity of species are affected due to alterations in the ecosystem and blockage in life cycle movements
