**Threatcasting** Brian David Johnson, Cyndi Coon, Natalie Vanatta, 2022-06-01 Impending technological advances will widen an adversary's attack plane over the next decade Visualizing what the future will hold and what new threat vectors could emerge is a task that traditional planning mechanisms struggle to accomplish given the wide range of potential issues Understanding and preparing for the future operating environment is the basis of an analytical method known as Threatcasting It is a method that gives researchers a structured way to envision and plan for risks ten years in the future Threatcasting uses input from social science technical research cultural history economics trends expert interviews and even a little science fiction to recognize future threats and design potential futures During this human centric process participants brainstorm what actions can be taken to identify track disrupt mitigate and recover from the possible threats Specifically groups explore how to transform the future they desire into reality while avoiding an undesired future The Threatcasting method also exposes what events could happen that indicate the progression toward an increasingly possible threat landscape This book begins with an overview of the Threatcasting method with examples and case studies to enhance the academic foundation Along with end of chapter exercises to enhance the reader's understanding of the concepts there is also a full project where the reader can conduct a mock Threatcasting on the topic of the next biological public health crisis The second half of the book is designed as a practitioner's handbook It has three separate chapters based on the general size of the Threatcasting group that walk the reader through how to apply the knowledge from Part I to conduct an actual Threatcasting activity This book will be useful for a wide audience from student to practitioner and will hopefully promote new dialogues across communities and novel developments in the area

**Saints of Hysteria** David Trinidad, Denise Duhamel, Maureen Seaton, 2007-03-06 Collaborative poetry poems written by one or more people grew out of word games played by French surrealists in the 1920s It was taken up a decade later by Japan's Vou Club and then by Charles Henri Ford who created the chainpoem composed by poets who mailed their lines all over the world After WW II the Beat writers collaborative experiments resulted in the famous Pull My Daisy The concept was embraced in the 1970s by feminist poets as a way to find a collective female voice Yet for all its rich history virtually no collections of collaborative poetry exist This

exhilarating anthology remedies the omission Featured are poems by two four even as many as 18 people in a dizzying array of forms villanelles to ghazals sonnets to somonkas pantoums to haiku even quizzes questionnaires and other nonliterary forms Collaborators notes accompany many of the poems giving a fascinating glimpse into the creative process **The Creatures at the Absolute Bottom of the Sea** Rosemary McGuire,2015-03-15 In *The Creatures at the Absolute Bottom of the Sea* Rosemary McGuire s compelling debut short story collection fishermen and women cling to a life on the ocean s border Risk and loss are habits to them but ones that have not undermined their essential humanity or their hearts Their lives are rugged full of grief and grace No one in these stories comes through unscarred but they still cling to the hope that comes from a belief in secular miracles A man witnesses a tragic accident that calls his own life into question A young woman meets her high school sweetheart after many years and seeks to make sense of the separate paths they ve taken And in the title story a soldier home from Iraq tries to rebuild his life in a remote Alaskan village These are fishing stories told as such stories are told simple violent often coarse but paying homage to the elemental beauty of the sea In the end the reader is left with a sense of the fragility and beauty of life as it is exposed in proximity to danger and loss *Wiley Pathways*

This book explores femicide and scrutinizes the three key American criminal doctrines usually applied in its cases: provocation, the felony murder rule, and self-defence. The book also explores the influence of the American Model Penal Code and proposes connected to the various criminal doctrines applicable to femicide, a focused and detailed amendment to the Code containing unique features and a formula providing a socio-legal response to issues that the author believes have not yet been adequately addressed. Though primarily focused on femicide in America, the issues discussed are of global relevance due to the tragically widespread nature of femicide, and the book also makes significant contributions to the legal discourse of many other countries with similar legal structures. **An Introduction to the Model Penal Code** Markus Dirk Dubber, 2015. In the second edition of his introductory overview of the Model Penal Code, now titled *An Introduction to the Model Penal Code*, Markus Dubber retains the book's original aim, approach, and structure as a companion to the Code. Reflecting the Code's attempt to present an accessible, comprehensive, and systematic account of American criminal law, this book unlocks the Code's potential as a key to American criminal law for law students and teachers, and for anyone else with an interest in getting a sense of the basic contours of American criminal law. *Social Protection in Africa* Frank Ellis, Stephen Devereux, Philip White, 2009-01-01. This timely book makes accessible to a broad audience the ideas, principles, and practicalities of establishing effective social protection in Africa. It focuses on the major shift in strategy for tackling hunger and vulnerability from emergency responses, mainly in the form of food transfers, to predictable cash transfers to the chronically poorest social groups. The first part of the book comprises nine theme chapters covering vulnerability, targeting, delivery, coordination, cost-effectiveness, market impacts, and asset effects, while the second part consists of fifteen social protection case studies. The continuous interplay between these two parts makes for a unique contribution to the contemporary literature on social protection. The book takes a positive and forward-looking view regarding the feasibility of achieving successful social transfers to the poorest in Africa; nevertheless, a critical stance is taken where appropriate, and unresolved strategic issues regarding the targeting, coverage, and scale of social transfers are highlighted. *Social Protection in Africa* is an essential read for personnel, advisors, and consultants working for aid donors, United Nations agencies, NGOs, and governments on social transfer programmes in sub-Saharan African countries. In addition, the book represents a valuable resource for training courses on social protection and will be vital reading for Masters-level students and researchers studying emergency relief, social protection, vulnerability, and poverty reduction in low-income countries. *Petroleum Hat* Drew Gardner, 2005. Poetry. Flarf. PETROLEUM HAT is natural language for a country at war. Unlike the old model of protest poetry, Drew Gardner isn't interested in earnest appeals to reason and compassion. He'll

match the political spectacle absurdity for absurdity and in the case of the funny and chilling Chicks Dig War I m struck by how thoroughly he understands the logic of our times Lazy Darwinian accounts of ourselves as celebrated in the New York Times Science and Business sections are satirized in tones borrowed and blended from sitcoms and textbooks Ange Mlinko
