Free Speech and the Politics of Identity David A. J. Richards, 1999 *Free Speech and the Politics of Identity* challenges the scholarly view as well as the dominant legal view outside the United States that the right of free speech may reasonably be traded off in pursuit of justice to stigmatized minorities These views appeal to an alleged reasonable balance between two basic human rights the right of free speech and the right against unjust discrimination Compelling arguments of normative political theory and interpretative history show however that these rights are structurally linked the abridgement of one compromises the other To make this case David Richards offers an original political theory of toleration and of structural injustice that addresses the nature and scope of the right of free speech and the right against unjust discrimination its analytic focus is on the role played by members of subordinated groups in the protest of the terms of structural injustice the politics of identity advancing constitutional justice under law While the argument is developed on the basis of American constitutional experience from the antebellum period forward its normative force is brought to bear both in defending and criticizing some aspects of American law and in challenging the continuing legitimacy of laws against group libel obscenity and blasphemy under national legal systems including Germany France Britain Canada Israel India South Africa and others regional systems the jurisprudence of the European Court of Human Rights and public international law The book's innovative normative and interpretative methodology calls for a new departure in comparative public law in which all states responsibly address their common problems not only of inadequate protection of free speech but correlative failure to take seriously the continuing political power of such evils as anti-Semitism racism sexism and homophobia

Politics as Public

Art Martin Zebracki, Z. Zane McNeill, 2022-12-30 *Politics as Public Art* presents a keystone collection that pursues new frameworks for a critical understanding of the relationship between public art and protest movements through the utilization of socially engaged and choreopolitical approaches. This anthology draws from a unique combination of interdisciplinary scholarship and activism where it integrates geographically rich perspectives from political and grassroots community contexts spanning the United States, Europe, Australia, and Southeastern Africa. The volume questions and reimagines not only how public art practice can be integral to politics including forms of surveillance and control of bodily movement. It also probes into how political participation itself can be construed as a form of public artmaking for radical social change and just worlds. This collection advocates for scholar-activist inquiry into how socially engaged public art practices can pave the way for thinking through and working toward championing more inclusive futures and, as such, choreographing greater intersectional justice. This book provides a wide appeal to audiences across humanities and social science scholarship, arts practice, and activism, seeking conceptual and empirically informed tools for moving from public art and choreopolitical theory into modes of praxis, critical reflection, and action.
