Heirs of Clausewitz Christopher N. Donnelly, 1985 *Mobilizing for Peace* Thomas R. Rochon, 2014-07-14 The crusade against nuclear weapons in Great Britain West Germany France and the Netherlands in the early 1980s dwarfed all previous protest movements in Western Europe in the postwar period What produced the demonstrations against NATO's decision in December 1979 to base 572 cruise and Pershing II missiles in five West European countries What generated the widespread support that the demonstrators enjoyed Contrary to the frequent claim that such political movements are a symptom of governmental crisis in the advanced industrial democracies Thomas Rochon develops the idea that they arise from a creative impulse and perform crucial functions of innovative criticism He concludes that the West European peace movement has ignited a public debate in which reduction or elimination of certain categories of nuclear weapons is taken seriously for the first time Among the topics examined are the sources of support for the peace movement in public opinion the types of people who joined or supported the movement and proposals they offered for a nonnuclear defense policy The author discusses the organization of the movement and its choice of tactics its impact on politics and the links between it and other institutions such as churches trade unions and political parties Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
