Protest Student Activism in America:

Protest! Julian Foster, Durward Long, 1969 **Student Activism and Protest** Edward E. Sampson, Harold Allen Korn, 1970 **Rebellion in the University** Seymour Martin Lipset, Political activity and student unrest have been recurring phenomena in American universities even after they reached their apogee in the 1960s In *Rebellion in the University* Seymour Martin Lipset reviews that turbulent period and places it in a larger historical perspective He analyzes the source of student activism the roles played by the faculty the spectrum of campus political opinion and the history of American campus protest Two decades after this book was first written the academic community is once more sharply divided over issues of political correctness The term refers to the efforts by campus advocates of leftist politics to control the content of speech courses and appointments and to impose their views with respect to multiculturalism minority rights and feminism Lipset's new introduction is a major effort to account for this new wave of repressive moralism to explain the issues involved to locate sources of support and opposition and to voice a judgment about the current situation in the American academic community

Student Activism in 1960s America Magnus O. Bassey, 2024-08-23 This book sheds light on the untold stories of individual student activists at Queens College New York City during the 1960s Against the backdrop of the ongoing Vietnam War and the assassination of President John F Kennedy some Americans began to lose faith in their government Based on injustices that students saw in their campuses in the country and in the world at large they began to question their political leaders Students organized their discontents over three major issues civil rights free speech and anti war sentiments Their protests involved direct actions such as sit ins marches picketing and boycotts At Queens College QC as the students moved away from the repressive McCarthy era of the 1950s they began to confront and challenge those in power at the college in the 1960s The defining characteristic of this break from the past was a student strike in 1961 in objection to the ban of controversial speakers who had been invited to campus by student clubs The student strike of 1961 gave the activists among them a direct and immediate way to fight power on campus and to fight racism and discrimination The author argues that student movements cannot be attributed to a single explanation and therefore he focuses on individual historical contexts presenting first person narratives from the actual participants and tells their stories in their own voices from their own records and from the documents they left behind The book identifies the QC student activists of the 1960s exploring how and why they became activists their activities their achievement as activists and what motivated them to think that they could make history themselves by confronting racism It provides an intimate look at the students lives and their social justice journey beginning at Queens College and as they moved into their careers **Student Activism and Curricular Change in Higher Education** Mikaila Mariel Lemonik Arthur, 2016-04-01 While higher education is still far from universal in the United States it plays an increasingly large role in shaping our collective understanding of what knowledge counts as legitimate and important Therefore understanding the college curriculum and how it is changed and shaped helps us to

understand the overall dynamics of knowledge in contemporary society This book considers the emergence of three curricular fields that have developed and spread over the past half century in American higher education Women s studies Asian American studies and Queer LGBT studies It details the broader history of their development as knowledge fields and then explains how when and why individual colleges and universities may choose to adopt such innovations Based on in depth case studies of curricular change processes at six colleges and universities across the United States the book demonstrates that social movements targeting colleges and universities play a major role in curricular change and sets forward a new model for understanding what it takes for social movements targeting organizations to make an impact **Student**

Ellsworth, Martha A. Burns, 1970 The Campus and a Nation in Crisis Willis Rudy, 1996 This book demonstrates how colleges and universities have played a vital role during times of great crisis in American history responding actively and helpfully to all the major challenges confronting their country The colleges of the land became politicized repeatedly by such momentous developments as the American Revolution the Civil War between the North and the South the two vast global conflicts of the twentieth century and America s controversial involvement in Southeast Asia Campus life became intensely fractious during these difficult and turbulent periods Violence sometimes accompanied the campus activism While there were significant differences in the response of groups on the campuses students and professors reacted differently for example to the crises of earlier times as compared to those in more recent years there is an element of continuity That thread of continuity from the Revolutionary era to Vietnam was the fact that time after time the members of the academic communities sought to resolve the nation s crises constructively They rallied to the cause of colonial rights and ultimately political independence They supported the aims of their embattled sections North and South They sought to influence their nation s responses to the global crises of the twentieth century And they campaigned to extricate the nation from an increasingly costly military entanglement in Southeast Asia In all five of these tests of national purpose the colleges and universities while not the ultimate decision makers helped shape the eventual patterns of America s response in an important way

Participation and Non-Participation in Student Activism Alexander Hensby, 2017-02-13 Why might some students convert their political interests into activism when others do not? There is a strong need to understand the changing dynamics of contemporary youth participation: how they engage, what repertoires are considered efficacious, and their motivations to get involved. This book uses the 2010-11 UK student protests against fees and cuts as a case study for analysing some of the key paths and barriers to political participation today. These paths and barriers, which include an individual's family socialisation, network positioning, and group identification and disidentification, help us explain why some people convert their political sympathies and interests into action and why others do not. Drawing on an original survey dataset of students, the book shows how and why students responded in the way that they did, whether by occupying buildings, joining marches, signing petitions, or not participating at all. Considering this in the context of other student movements across the globe, the book's combination of quantitative and qualitative methods and its theoretical contribution provide a more holistic picture of student protest than is found in existing studies.

Teaching the American Civil Rights Movement Julie Buckner Armstrong, 2002 The past fifteen years have seen renewed interest in the civil rights movement. Television documentaries, films, and books have brought the struggles into our homes and classrooms once again. New evidence in older criminal cases demands that the judicial system reconsider the accuracy of investigations and legal decisions. Racial profiling, affirmative action, voting districting, and school voucher programs keep civil rights on the front burner in the political arena. In light of this, there are very few resources for teaching the civil rights at the university level. This timely and invaluable book fills this gap. This book offers perspectives on presenting the movement in different classroom contexts, strategies to make the movement come alive for students, and issues highlighting topics that students will find appealing. Including sample syllabi and detailed descriptions from courses that prove effective, this work will be useful for all instructors, both college and upper level high school, for courses in history, education, race, sociology, literature, and political science.

Student Activism in Asia Meredith Leigh Weiss, Edward Aspinall, 2012 Since World War II, students in East and Southeast Asia have led protest movements that toppled authoritarian regimes in countries such as Indonesia, South Korea, and Thailand. Elsewhere in the region, student protests have shaken regimes until they were brutally suppressed, most famously in China's Tiananmen Square and in Burma. But despite their significance, these movements have received only a fraction of the notice that has been given to American and European student protests of the 1960s and 1970s. The first book in decades to redress this neglect, *Student Activism in Asia* tells the story of student protest movements across Asia. Taking an interdisciplinary comparative approach, the contributors examine ten countries, focusing on those where student protests have been particularly fierce and consequential: China, Japan, Hong Kong, Taiwan, South Korea, Indonesia, Burma, Malaysia, Thailand, and the Philippines. They explore similarities and differences among student movements in these countries, paying special attention to the influence of four factors: higher education systems, students' collective identities, students' relationships with

ruling regimes and transnational flows of activist ideas and inspirations The authors include leading specialists on student activism in each of the countries investigated Together these experts provide a rich picture of an important tradition of political protest that has ebbed and flowed but has left indelible marks on Asia's sociopolitical landscape Contributors Patricio N Abinales U of Hawaii Manoa Prajak Kongkirati Thammasat U Thailand Win Min Vahu Development Institute Stephan Ortmann City U of Hong Kong Mi Park Dalhousie U Canada Patricia G Steinhoff U of Hawaii Manoa Mark R Thompson City U of Hong Kong Teresa Wright California State U Long Beach
