Leo Strauss on Political Philosophy Leo Strauss, 2021-12-24 Leo Strauss is known primarily for reviving classical political philosophy through careful analyses of works by ancient thinkers As with his published writings Strauss's seminars devoted to specific philosophers were notoriously dense accessible only to graduate students and scholars with a good command of the subject In 1965 however Strauss offered an introductory course on political philosophy at the University of Chicago Using a conversational style he sought to make political philosophy as well as his own ideas and methods understandable to those with little background on the subject *Leo Strauss on Political Philosophy* brings together the lectures that comprise Strauss's Introduction to Political Philosophy Strauss begins by emphasizing the importance of political philosophy in determining the common good of society and critically examining the two most powerful contemporary challenges to the possibility of using political theory to learn about and develop the best political order positivism and historicism In seeking the common good classical political philosophers like Plato and Aristotle did not distinguish between political philosophy and political science Today however political philosophy must contend with the contemporary belief that it is impossible to know what the good society really is Strauss emphasizes the need to study the history of political philosophy to see whether the changes in the understanding of nature and conceptions of justice that gradually led people to believe that it is not possible to determine what the best political society is are either necessary or valid In doing so he ranges across the entire history of political philosophy providing a valuable thematically coherent foundation including explications of many canonical thinkers such as Auguste Comte and Immanuel Kant about whom Strauss did not write extensively in his published writings

What is Political Philosophy? And Other Studies Leo Strauss, 1988-10-15 All political action has in itself a directedness towards knowledge of the good of the good life or of the good society For the good society is the complete political good If this directedness becomes explicit if men make it their explicit goal to acquire knowledge of the good life and of the good society political philosophy emerges The theme of political philosophy is mankind's great objectives freedom and government or empire objectives which are capable of lifting all men beyond their poor selves Political philosophy is that branch of
