Proustian Quest:

The Proustian Quest William Carter, Jeffrey Lange, 1994-02 An ambitious study the fruit of sustained work over many years Professor Carter's book deploys a stunning knowledge of Proust and places Carter among the first line of Proust scholars in the country Roger Shattuck Boston University The Proustian Quest is the first full length study that explores the influence of social change on Proust's vision In Remembrance of Things Past Proust describes how the machines of transportation and communication transformed fashion social mores time space perception and the understanding of the laws of nature Concentrating on the motif of speed Carter establishes the centrality of the modern world to the novel s main themes and produces a far reaching synthesis that demonstrates the work s profound structural unity Belle Epoque Mary McAuliffe, 2014-03-16 Mary McAuliffe s Dawn of the Belle Epoque took the reader from the multiple disasters of 1870 1871 through the extraordinary re emergence of Paris as the cultural center of the Western world Now in Twilight of the Belle Epoque McAuliffe portrays Paris in full flower at the turn of the twentieth century where creative dynamos such as Picasso Matisse Stravinsky Debussy Ravel Proust Marie Curie Gertrude Stein Jean Cocteau and Isadora Duncan set their respective circles on fire with a barrage of revolutionary visions and discoveries Such dramatic breakthroughs were not limited to the arts or sciences as innovators and entrepreneurs such as Louis Renault Andr Citro n Paul Poiret Fran ois Coty and so many others including those magnificent men and women in their flying machines emphatically demonstrated But all was not well in this world remembered in hindsight as a golden age and wrenching struggles between Church and state as well as between haves and have nots shadowed these years underscored by the ever more ominous drumbeat of the approaching Great War a cataclysm that would test the mettle of the City of Light even as it brutally brought the Belle Epoque to its close Through rich illustrations and evocative narrative McAuliffe brings this remarkable era from 1900 through World War I to vibrant life Atlantic Automobilism Gijs Mom, 2014-12-01 Our continued use of the combustion engine car in the 21st century despite many rational arguments against it makes it more and more difficult to imagine that transport has a sustainable future Offering a sweeping transatlantic perspective this book explains the current obsession with automobiles by delving deep into the motives of early car users It provides a synthesis of our knowledge about the emergence and persistence of the car using a broad range of material including novels poems films and songs to unearth the desires that shaped our present car society Combining social psychological and structural explanations the author concludes that the ability of cars to convey transcendental experience especially for men explains Benjamin, Barthes and the Singularity of Photography Kathrin Yacavone, 2012-02-02 our attachment to the vehicle Benjamin Barthes and the Singularity of Photography presents two figures of the twentieth century in a comparative light Pursuing aspects of Benjamin's and Barthes's engagement with photography it provides interpretations of texts argues that despite the different historical philosophical and cultural contexts of their work Benjamin and Barthes engage with similar

issues and problems that photography poses including the relationship between the photograph and its beholder as a confrontation between self and other and the dynamic relation between time subjectivity memory and loss Each writer emphasizes the singular event of the photograph's apprehension and its ethical and existential aspects rooted in the power and poignancy of photographic images The book mapping the relationship between photographic history and theory cultural criticism and autobiography Airspaces David Pascoe, 2004-08-01 This book argues that airspace the transitional area between check in desk and baggage carousel must be regarded as a discrete destination on any map of our age Invisible Middle Term in Proust's A la Recherche Du Temps Perdu Roxanne Hanney, 1990 This volume seeks to offer a new way of reading A la Recherche du Temps Perdu using a fluid manner of interpretation which suggests process rather than product This study contends that everything in Proust's work is threefold The middle term is the common ground shared by the two terms of comparison that constitute a metaphor Science and Structure in Proust's A la Recherche Du Temps Perdu Nicola Luckhurst, 2000 Proust is read as a writer of maxims and metaphors of short and long sentences as at once an aesthete and a scientific thinker His A la recherche du temps perdu is a hybrid a novel essay an epistemological debate that crosses the boundaries between two cultures art and science Science and Structure explores the epistemological alertness and anxiety of Proust's masterpiece and in so doing illuminates the interrelations between modernist art and science Art of Subtraction Bruno Lessard, 2017-05-08 The Art of Subtraction is the first full length study on the CD ROM as a creative platform Bruno Lessard traces the rise and relatively rapid fall of the CD ROM in the 1980s and 1990s and its impact as a creative platform for media artists such as Jean Louis Boissier Zoe Beloff Adriene Jenik and Chris Marker Although the CD ROM was not a lasting commercial success it was a vibrant medium that allowed for experimentation in adapting literary works Building on the work of Gilles Deleuze and Michele Foucault Lessard establishes a comparative framework for linking digital adaptations with innovative concepts such as subtractive adaptation and the object image that will be of interest to researchers examining literary adaptations on other digital platforms such as websites smart phones tablets and digital games The Art of Subtraction is a fascinating study of intermediality in the late twentieth century and it provides the first chapter in the yet unwritten history of digital adaptation *Emotions, the Social Bond, and Human Reality* Thomas J. Scheff,1997-09-04 This book first published in 1997 offers an approach to researching human behavior relating details of The Senses of Modernism Sara Danius, 2019-01-24 In The Senses of Modernism Sara interaction to social structure Danius develops a radically new theoretical and historical understanding of high modernism The author closely analyzes Thomas Mann's The Magic Mountain Marcel Proust's Remembrance of Things Past and James Joyce's Ulysses as narratives of the sweeping changes that affected high and low culture in the age of technological reproduction In her discussion of the years from 1880 to 1930 Danius proposes that the high modernist aesthetic is inseparable from a technologically mediated crisis of the senses She reveals the ways in which categories of perceiving and knowing are realigned when technological

devices are capable of reproducing sense data Sparked by innovations such as chronophotography phonography radiography cinematography and technologies of speed this sudden shift in perceptual abilities had an effect on all arts of the time Danius explores how perception notably sight and hearing is staged in the three most significant modern novels in German French and British literature The Senses of Modernism connects technological change and formal innovation to transform the study of modernist aesthetics Danius guestions the longstanding acceptance of a binary relationship between high and low culture and describes the complicated relationship between modernism and technology challenging the conceptual divide between a technological culture and a more properly aesthetic one The Plot Machine Kai Mikkonen, 2021-11-01 This book presents a new and exciting theory of the modern French novel by developing the notion of the narrative as a textual machine Many turn of the century French novels thematically identified their means of narration through the various machines that they depicted The narrative devices that were particularly important in this self reflection included the temporal order of the plot the question of a narrative s beginning and end the hierarchy of narrative voices and the techniques of the point of view The question of mechanization became central on all these fronts Has the novel become automated or machine like At the same time the machine metaphors in the novels of Alfred Jarry Emile Zola Jules Verne Villiers de l Isle Adam Raymond Roussel combined the question of the narrative form with new ways to think about man's relationship with technology and the cultural environment The early modernist texts drew upon contradictory notions of technological promise and threat while they also depicted new forms of identity and behavior related to or modeled after machines These texts highlighted cultural assumptions concerning technological innovations and critiqued mainly through parody and through various figures of man machine fusion the positivistic belief in progress Such writers looked for evidence of advanced forms of consciousness arising out of encounters with new technology such as telephones trains bicycles telegraphy phonographs and electricity This volume will be of interest to anyone working in the field of modern French literary and cultural history It will especially appeal to anyone intrigued with the origins of the modernist novel the history of narrative forms and the question of how the experience of new technology may be portrayed in literary texts The Seduction of Pessimism in the Novel Tom Ribitzky, 2024-10-18 The Seduction of Pessimism in the Novel Eros Failure and the Quarrel with Philosophy explores the novel as a response to the Platonic myth that narrates the rift at the core of our being Eros is supposedly the consolation for this rift but the history of the novel documents its expression as one of frustrated desires neuroses anxieties and cosmic doom As if repeating the trauma from that original split in Plato a split that also divides philosophy from literature the novel treats eros as a site of loss and grief from the medieval romances to Goethe Bront Proust Mann Woolf Lawrence and Nabokov The pessimism that emerges from this eros tells us something fundamental about who we are something that only the novel can say At a time when both education and leisure are increasingly ignoring the novel s imperative to sit with ambiguity complexity and contingency and as we are hurtling toward a bleak future of climate catastrophe and political instability the

novel is one of the last bastions of humanity even as it is quickly being eroded Photobiography Akane Kawakami, 2017-12-02 Why do photographs interest writers especially autobiographical writers Ever since their invention photographs have featured as metaphors as absent inspirations and latterly as actual objects in written texts In autobiographical texts their presence has raised particularly acute questions about the rivalry between these two media their relationship to the real and the nature of the constructed self In this timely study based on the most recent developments in the fields of photography theory self writing and photo biography Akane Kawakami offers an intriguing narrative which runs from texts containing metaphorical photographs through exphrastic works to phototexts Her choice of Marcel Proust Herve Guibert Annie Ernaux and Gerard Mace provides unusual readings of works seldom considered in this context and teases out surprising similarities between unexpected conjunctions Akane Kawakami is a Senior Lecturer in French and francophone literature at Birkbeck University of London **Thresholds** Gerda R. Blumenthal, 1984 **Proust in Perspective** Armine Kotin Mortimer, Katherine Kolb, 2002-08-07 Marcel Proust speaks to us today as a contemporary and a classic His great novel resonates across languages and time summing up the past interpreting the present and envisioning the future For Proust in Perspective scholars from France Italy Belgium Germany Sweden Japan Canada and the United States have drawn on rich new editions of Proust's novel and correspondence to bring us fresh views of his work In nineteen original essays a foreword by Jean Yves Tadi and an introduction by editors Armine Kotin Mortimer and Katherine Kolb this volume guides readers through the dense weave of Proust's fiction and correspondence The essays take us into the realm of Proustian language as quotation metaphor and memory and into art history and musical ideology connecting the art of words with the words of art They explore the interface of history and fiction the mysteries of the text's evolution and the dilemmas of its publication They present the revelations of genetic criticism and the surprises of gender analysis Taken together these essays conjure a multifaceted profile of Proust his work life character and influence and of new directions in Proust scholarship today With compelling rigor and infectious enthusiasm Proust in Perspective conveys the magnitude of Proust's continuing appeal

Understanding Marcel Proust Allen Thiher,2013-08-15 Understanding Marcel Proust includes an overview of Marcel Proust s development as a writer addressing both works published and unpublished in his lifetime and then offers an in depth interpretation of Proust s major novel In Search of Lost Time relating it to the Western literary tradition while also demonstrating its radical newness as a narrative In his introduction Allen Thiher outlines Proust s development in the context of the political and artistic life of the Third Republic arguing that everything Proust wrote before In Search of Lost Time was an experiment in sorting out whether he wanted to be a writer of critical theory or of fiction Ultimately Thiher observes all these experiments had a role in the elaboration of the novel Proust became both theorist and fiction writer by creating a bildungsroman narrating a writer s education What is perhaps most original about Thiher s interpretation however is his demonstration that Proust removed his aged narrator from the novel s temporal flow to achieve a kind of fictional

transcendence Proust never situates his narrator in historical time which allows him to demonstrate concretely what he sees as the function of art the truth of the absolute particular removed from time s determinations. The artist that the narrator hopes to become at the end of the novel must pursue his own individual truths those in fact that the novel has narrated for him and the reader up to the novel s conclusion Written in a language accessible to upper level undergraduates as well as literate general readers Understanding Marcel Proust simultaneously addresses a scholarly public aware of the critical arguments that Proust's work has generated Thiher's study should make Proust's In Search of Lost Time more widely accessible by explicating its structure and themes **The Book of Touch** Constance Classen, 2020-09-03 This book puts a finger on the nerve of culture by delving into the social life of touch our most elusive yet most vital sense From the tortures of the Inquisition to the corporeal comforts of modernity and from the tactile therapies of Asian medicine to the virtual tactility of cyberspace The Book of Touch offers excursions into a sensory territory both foreign and familiar How are masculine and feminine identities shaped by touch What are the tactile experiences of the blind or the autistic How is touch developed differently across cultures What are the boundaries of pain and pleasure Is there a politics of touch Bringing together classic writings and new work this is an essential guide for anyone interested in the body the senses and the experiential world The Chinese Enlightenment Vera Schwarcz, 1986 It is widely accepted both inside China and in the West that contemporary Chinese history begins with the May Fourth Movement Vera Schwarcz's imaginative new study provides China scholars and historians with an analysis of what makes that event a turning point in the intellectual spiritual cultural and political life of twentieth century China The Cambridge Introduction to Marcel Proust Adam Watt, 2011-04-07 Proust s A la recherche du temps perdu In Search of Lost Time 1913 27 changed the course of modern narrative fiction This Introduction provides an account of Proust's life the socio historical and cultural contexts of his work and an assessment of his early works At its core is a volume by volume study of In Search of Lost Time which attends to its remarkable superstructure as well as to individual images and the intricacies of Proust's finely stitched prose The book reaches beyond stale commonplaces of madeleines and memory alerting readers to Proust's verbal virtuosity his preoccupations with the fleeting and the unforeseeable with desire jealousy and the nature of reality Lively informative chapters on Proust criticism and the work's afterlives in contemporary culture provide a multitude of paths to follow The book charges readers with the energy and confidence to move beyond anecdote and hearsay and to read Proust's novel for themselves Albert-Birot Debra Kelly, 1997 This book tries to encompass the life's achievement of Pierre Albert Birot in art poetry and prose This book is a rich and exhaustively researched study of a fascinating figure and a most original mind The volume also attempts to encompass a life s achievement and to view globally Albert Birot s artistic poetic and prose productions As such this is an important contribution to the study and knowledge of French literature of the first half of the twentieth century and to interdisciplinary studies It is of interest not only to specialists in French literature but also to art historians literary
