The History of Chinese Ceramics

Lili Fang,2023-05-23 Adopting the perspective of anthropology of art and combining it with global academic insights this book helps the readers to recognize that history is in great measure the record of human activity which spreads from the local to the regional from the regional to the global and from the global to the universal Readers will learn that China was not only the first country to create porcelain but also the first to export it to the world both the products and its techniques Therefore the history of Chinese ceramics reflects the history of Chinese foreign trade on the one hand and depicts the expansion of Chinese ceramic techniques and cultures on the other In addition to ceramics types molds decoration and

techniques the book analyzes the spiritual impacts and aesthetic conceptions embodied in the utensils of daily use by the Chinese literati Therefore it reaches the conclusion that ideological systems and not technological systems are what bring about social revolutions In addition the book is richly illustrated with pictures of earthenware and finely glazed pieces from later periods **The National Union Catalog, Pre-1956 Imprints** Library of Congress,American Library Association.
