Provincial Strategies of Economic Reform in Post-Mao China Peter T. Y. Cheung, Zhimin Lin, 1998 This book studies economic decentralization in eight Chinese provinces Shanghai Zhejiang Guangdong Shaanxi Shandong Fujian Hainan and Sichuan by focusing on the role of provincial leadership in the initiation and implementation of economic reform

Provincial Strategies of Economic Reform in Post-Mao China Zhimin Lin, Peter T. Y. Cheung, Chae-ho Chöng, 2015

Governance and Politics of China Tony Saich, 2017-09-07 The success or failure of China's development will impact not only its own citizens but also those of the world China is widely recognized as a global actor on the world stage and no global challenge can be resolved without its participation Thus it is important to understand how the country is ruled and what the policy priorities are of the new leadership Can China move to a more market based economy while controlling environmental degradation Can it integrate hundreds of millions of new migrants into the urban landscape The tensions between communist and capitalist identities continue to divide society as China searches for a path to modernization The People's Republic is now over 65 years old an appropriate juncture at which to reassess the state of contemporary Chinese politics In this substantially revised fourth edition and essential guide to the subject Tony Saich delivers a thorough introduction to all aspects of politics and governance in post Mao China taking full account of the changes of the 18th Party Congress and the 12th National People's Congress Further the rise of Xi Jinping to power and his policies are examined as are important policy areas such as urbanization and the fight against corruption

Chinese Provincial Leaders Zhiyue Bo, 2019-09-17 Based on biographical data on more than 2 500 individuals in China's thirty provincial units from the beginning of the People's Republic in 1949 this is the most comprehensive and systematic treatment of China's provincial leaders ever published The study presents detailed accounts of four categories of provincial leaders party secretaries deputy party secretaries governors and vice governors including age gender nationality hometown education party membership and length of membership It also traces the careers of these leaders in terms of promotion demotion transfer and retirement And using sophisticated statistical analysis it links the political mobility of these leaders to the economic performance of their provincial units

China's Provinces in Reform David Goodman, 2002-11 Explores the impact of social and political change on China's provinces during the reform era Offering an in depth comparative analysis of a number of major provinces it challenges generalizations over the nature of change in China

China's Cotton Industry Björn Alpermann, 2010-04-05 This book examines the political economy of the cotton processing industry analyzes the process of cotton policy making and looks at how local

governments and the former monopolist cope with the changes brought about by marketization *The Chinese Party-State in the 21st Century* Andre Laliberte, Marc Lanteigne, 2007-12-18 As the Chinese Communist Party continues to move away from socialism it faces a growing number of challenges to the claim that it represents the sole legitimate governing body in China In order to reaffirm itself as the most effective force for keeping the country together the CCP has adapted to contemporary political conundrums in a variety of ways Rejecting pessimistic perspectives which predict an erosion of state power or naive optimism that state society relations will evolve towards a Western style pluralist democracy in the foreseeable future the contributions to this volume explore many ways in which the CCP selectively adapts to the challenges that have arisen from its strategy of rapid economic growth at the expense of political reform in order to maintain its authority and relevance Examining trends such as the reliance on religious charities originating from outside the PRC the revival of local governance in urban settings the passing of legislation for workers or the multiplication of environmental non governmental organizations this book tackles the question of whether the Chinese government can overcome these challenges *The Chinese Party State in the 21st Century* Adaptation and the Reinvention of Legitimacy will appeal to students and scholars of Chinese politics Asian politics comparative politics and political sociology *Digital Dragon* Adam Segal, 2003 Based on interviews with entrepreneurs and local government officials as well as numerous published primary sources *Digital Dragon* is the first detailed look at a major Chinese institutional experiment and at high tech endeavors in China **BOOK JACKET** *Rent Seeking in China* Tak-Wing Ngo, Yongping Wu, 2008-12-04 In China rent seeking has been linked to the idea of the local developmental state in which rapid economic development is explained in terms of the promotion of village and township enterprises by local cadres who want to maximize revenue At the same time the rent seeking state is also seen as the root of corrupt practices and in the creation of a political market where state assets and authorities are diverted into private interests Despite the prevalence of rent seeking practices in present day China no systematic study of the phenomenon across different regions and economic sectors has yet been undertaken and as such what accounts for the occurrence of the phenomenon what range of activities are related to rent seeking practices and more importantly how rent seeking shapes political and economic development are barely understood *Rent Seeking in China* seeks to address these questions using case studies from across economics sectors including primary industry strategic industry heavy industry and light industry It will be invaluable reading for students and scholars of Chinese politics comparative politics and Chinese economic and business management *Locating the Proper Authorities* Daniel W. Drezner, 2003 **DIV** Examines how international organizations are used as a means of bypassing domestic opposition to policy change **div**

Dancing with the Devil Yi-min Lin, 2017-05-01 From 1978 through the turn of the century China was transformed from a state owned economy into a predominantly private economy This fundamental change took place under the Chinese Communist Party CCP which has been ideologically and politically predisposed to suppress private ownership In *Dancing*

with the Devil Yi min Lin explains how and why such a paradoxical reality came about He shows that private ownership became a necessary evil for the CCP because the public sector was increasingly unable to address two essential concerns for regime survival employment and revenue Focusing on political actors as major change agents Lin examines how their self interested behavior led to the decline of public ownership in the context of China s evolving demographics and fiscal system The constraints and incentives associated with these factors help explain CCP leaders initial decision to allow limited private economic activities at the outset of reform They also shed light on the ballooning opportunism among lower officials which undermined the vitality of public enterprises Furthermore they hold a key to understanding the timing of the massive privatization in the late 1990s as well as its tempo and spread thereafter *Dancing with the Devil* illustrates how the driving forces developed and played out in these intertwined episodes of the story In so doing it offers new insights into the mechanisms of China s economic transformation and enriches theories of institutional change *China's Communist Revolutions* Werner Draguhn,David S.G. Goodman,2012-10-12 During its fifty years of existence the People s Republic of China has seen dramatic changes from the proclamation of the independent state through the period of the Communist Revolution the Cultural Revolution the Reform Period These changes are analysed from the political economic and social points of view chlllaenging accepted orthodoxy Throughout the emphasis is on change in the context of contemporary China and as part of the Chinese Communist Party s search for paths to development **Reform and the Non-State Economy in China** H. Lai,2006-11-27 Built on rich data analyses this book offers a fresh and in depth explanation of how China s pro reform leaders successfully launched controversial policies to promote private and foreign economic sectors managed leadership conflict and ensured reform in the provinces and rapid growth in the nation *China Rising* David Goodman,Gerald Segal,2013-07-23 China s dramatic economic growth since the 1970s has seemed inexorable The resulting rise in international profile has provoked a lively argument regarding the fundamental economic and strategic challenges to the rest of the world that China now presents *China Rising* examines the extent to which that country s future foreign policy stance may be shaped by its own agendas and constrained through interdependence and interaction with the outside world In the process it also questions the extent to which the rest of the world can attempt to shape that future to non Chinese interests with any chance of success Most debates regarding China s future international position tend to be polarised between those advocating containment and those wishing to see Beijing given a much freer hand *China Rising* provides a refreshing alternative to both **Entrepreneurship in China** Keming Yang,2016-04-29 The emergence of China as a major world economy is of great importance to the global political economy and to international business There has been much research on the macro level of institutional reform but little detailed work on the grassroots level of entrepreneurship in China This innovative book addresses this gap by investigating how an economic system dominated by central plans communist ideologies and suppressing bureaucracies could generate such energy from the bottom of society fuelling the

country's economic growth. Keming Yang's theory of entrepreneurship is based on two interrelated concepts: double entrepreneurship and institutional holes. He argues that the two concepts bridge a gap between the neo-classical institutionalism of economic development and entrepreneurship studies that emphasize individual choice. The rigorous theoretical framework is supported by substantial empirical research offering statistical analyses of survey data as well as detailed case studies. This timely book will appeal to an interdisciplinary readership in sociology, economics, business studies, and Chinese and Asian Studies.

China and the Global Political Economy S. Breslin, 2016-04-30 This IPE Classic considers one of the most pressing issues of the Twenty First century: the relationship between domestic configurations of power and globalized production processes in shaping the process and implications of China's re-engagement with the global economy.

China's Local Administration Jae Ho Chung, Tao-chiu Lam, 2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level, whereas local government, which has played and continues to play a key role in these developments, is often overlooked. The themes of China's local administrative hierarchy and its historical evolution have until now received scant attention; this book fills that gap and presents a comprehensive survey of China's local administration from the province down to the township. It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China: the province, the centrally administered municipality, the ethnic minority autonomous region, the special administrative region, the deputy provincial city, the prefecture, the county, township, and urban district. It investigates how each of the different levels of China's local administration has developed historically, both before and after 1949, and it explores the functions, political and economic, that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time. It also discusses how far the post-Mao reforms have affected local administration and how the local administrative hierarchy is likely to develop going forward.

Rethinking China's Provinces John Fitzgerald, 2003-09-02 This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the People's Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province in history, this volume identifies new developments in the territorial administration of the People's Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

Hainan - State, Society, and Business in a Chinese Province Kjeld Erik Brødsgaard, 2008-08-27 This book examines the complex relationship between the state, society, and business in China, focusing on the experience of the island province of Hainan. It provides detailed evidence of how relations between

party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today
