Prudences Of Food:

Food and Femininity in Twentieth-Century British Women's Fiction Andrea Adolph, 2016-04-15 In her feminist intervention into the ways in which British women novelists explore and challenge the limitations of the mind body binary historically linked to constructions of femininity Andrea Adolph examines female characters in novels by Barbara Pym Angela Carter Helen Dunmore Helen Fielding and Rachel Cusk Adolph focuses on how women's relationships to food cooking eating serving are used to locate women's embodiment within the everyday and also reveal the writers' commitment to portraying a unified female subject For example using food and food consumption as a lens highlights how women writers have used food as a trope that illustrates the interconnectedness of sex and gender with issues of sexuality social class and subjectivity all aspects that fall along a continuum of experience in which the intellect and the physical body are mutually complicit Historically grounded in representations of women in periodicals housekeeping and cooking manuals and health and beauty books Adolph's theoretically informed study complicates our understanding of how women's social and cultural roles are intricately connected to issues of food and food consumption

ceramic blossoms and a smokestack hidden in a blue banded minaret so as to foil the town from reclaiming the beach for public use The explosion shakes both the apple crate where Prudence the daughter of Tiffany s prized gardener is sleeping and the rocks where Randall her seven year old brother is playing Nearly a century later Prudence receives an unexpected visit at her New York apartment from Grace a hospice nurse and the granddaughter of Randall who Prudence never saw again after he left at age fourteen for California The mementos Grace carries from her grandfather s house stir Prudence s long repressed memories and bring her to a new understanding of the choices she made in work and love and what she faces now in her final days Spanning the twentieth century and three continents The Peacock Feast ricochets from Manhattan to San Francisco from the decadent mansions of the Tiffany family to the death row of a Texas prison and from the London consultation room of Anna Freud to a Mendocino commune With psychological acuity and aching eloquence Lisa Gornick has written a sweeping family drama an exploration of the meaning of art and the art of dying and an illuminating portrait of how our decisions reverberate across time and space

Food and Knowledge in Renaissance Italy Deborah L Krohn, 2016-04-15 Though Bartolomeo Scappi s Opera 1570 the first illustrated cookbook is well known to historians of food up to now there has been no study of its illustrations unique in printed books through the early seventeenth century In Food and Knowledge in Renaissance Italy Krohn both treats the illustrations in Scappi s cookbook as visual evidence for a lost material reality and through the illustrations including several newly discovered hand colored examples connects Scappi s Opera with other types of late Renaissance illustrated books What emerges from both of these approaches is a new way of thinking about the place of cookbooks in the history of knowledge Krohn argues that with the increasing professionalization of many skills and trades Scappi was at the vanguard of a new way of looking not just at the kitchen as workshop or laboratory but at the ways in which artisanal knowledge was visualized and disseminated by a range of craftsmen from engineers to architects The recipes in Scappi s Opera belong on the one hand to a genre of cookery books household manuals and courtesy books that was well established by the middle of the sixteenth century but the illustrations suggest connections to an entirely different and emergent world of knowledge It is through study of the illustrations that these connections are discerned explained and interpreted As one of the most important cookbooks for early modern Europe the time is ripe for a focused study of Scappi s Opera in the various contexts in which Krohn frames it book history antiquarianism and visual studies
