Prussian Schoolteachers:

Prussian Schoolteachers Anthony J. LaVopa, 1980 In analyzing the social and professional struggles of Prussian elementary schoolteachers from the time of Frederick the Great to the end of 1848 La Vopa focuses on the first generation of trained teachers and their emancipation movement in the Revolution of 1848 This case history explores the subjective experience of social mobility the emergence of corporate solidarity and the relationship between professional aspirations and ideological commitment Originally published in 1980 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value **The Prussian Elementary Schools** Thomas Alexander, 1918 *Reading and*

Rebellion in Catholic Germany, 1770–1914 Jeffrey T. Zalar, 2019 Interrogates the belief that the clergy defined German Catholic reading habits showing that readers frequently rebelled against their church's rules **The Common School Awakening** David Komline, 2020-08-24 A statue of Horace Mann erected in front of the Boston State House in 1863 declares him the Father of the American Public School System For over a century and a half most narratives about early American education have taken this epithet as the truth As Mann looms over the Boston Common so he has also loomed over discussions of early American schooling Other scholarship has emphasized economic factors as the main reason for the emergence of public schools The Common School Awakening offers a new narrative about the rise of public schools in America that counters these conceptions In this book David Komline explains how a broad and distinctly American religious consensus emerged in the first half of the nineteenth century allowing people from across the religious spectrum to cooperate in systematizing and professionalizing America's schools in an effort to Christianize the country At the height of this movement several states introduced state sponsored teacher training colleges and concentrated government oversight of schools in offices such as the one held by Mann Shortly thereafter the religious consensus that had served as the foundation for this common school system disintegrated But the system itself remained the legacy of not just one man but of a whole network of reformers who put into motion a transatlantic and transdenominational religious movement the Common School Awakening **An American Teacher's Year in a Prussian Gymnasium** William S. Learned, 2016-08-26 Excerpt from *An American Teacher's Year in a Prussian Gymnasium A Report to the Carnegie Foundation for the Advancement of Teaching* For three years past an exchange of secondary school teachers has been carried on between Prussia and the United States Each autumn ten or twelve Prussian teachers come to secondary schools or colleges in the United States and a similar number of American secondary teachers go to Gymnasien in Prussia The arrangement for the assignment of American teachers to the German schools is in the hands of the Prussian Minister of Instruction The details for selection of American teachers and for the assignment of Prussian teachers are in the hands of the President of the Carnegie Foundation Secondary

schools and secondary school teachers in the United States have not appreciated at its full value the opportunity thus offered to an American teacher or to an American school. It is not easy for a foreign teacher to obtain a nearby view of the Prussian Gymnasium. To become therefore a member of the teaching staff to be taken into the entire official and social life of the school is therefore an experience which can not fail to be of the greatest value to the ambitious teacher. Such a teacher returns to his home with new enthusiasm and greatly increased capacity for usefulness. There is therefore every reason why the boards of control and the principals of high schools should make a generous provision in the case of any teacher who has the ambition and the capacity to undertake such a year's work. Similarly a school seeking to freshen its own methods of teaching will find advantages in welcoming to its corps of teachers for a year a teacher trained in the Prussian school methods.

By considering issues both fundamental and topical from citizenship to lifelong learning, from school effectiveness to learning outside the school, this book provides a comprehensive multi-disciplinary guide to education in the new era.

Latin American Scholars of Comparative Education Jason Beech, Cristina Alarcón López, 2025-02-28 Providing one of the first accounts in English of the work of the founding scholars of comparative

education in Latin America from the 19th and 20th centuries this book presents a detailed analysis of their influence on the field and highlights the pivotal role played by each scholar in the development of comparative education in the Global South. The book chiefly comprises biographical contributions about the achievements of significant Latin American scholars both in terms of critical historical epistemological traditions and educational reforms that impacted the development of Latin American societies and education systems. Across 13 chapters the book discusses travellers who contributed to the post-independence period of nation building, progressive reformers inspired by the work of John Dewey, and finally scholars who played a key role in the institutionalisation of the field of comparative education in the region. Novel in its focus, even considering publications in Spanish and Portuguese, the book ultimately appeals to the current interest in understanding comparative education and its history as a worldwide project. Exploring the history of comparative education beyond the confines of established Anglo-European accounts, this volume will be of great interest to researchers and scholars in comparative and international education, history of education, and Latin American studies.
