Migrants and Identity in Japan and Brazil Daniela de Carvalho, 2003-08-27 Economic and social difficulties at the beginning of the 20th century caused many Japanese to emigrate to Brazil. The situation was reversed in the 1980s as a result of economic downturn in Brazil and labour shortages in Japan. This book examines the construction and reconstruction of the ethnic identities of people of Japanese descent firstly in the process of emigration to Brazil up to the 1980s and secondly in the process of return migration to Japan in the 1990s. The closed nature of Japan's social history means that the effect of return migration can clearly be seen. Japan is to some extent a unique sociological specimen owing to the absence of any tradition of receiving immigrants. This book is first of all about migration but also covers the important related issues of ethnic identity and the construction of ethnic communities. It addresses the issues from the dual perspective of Japan and Brazil. The findings suggest that mutual contact has led neither to a state of conflict nor to one of peaceful coexistence but rather to an assertion of difference. It is argued that the Nikkeijin consent strategically to the social definitions imposed upon their identities and that the issue of the Nikkeijin presence is closely related to the emerging diversity of Japanese society.

Japan at the Millennium David W. Edgington, 2003 Japan today is at an important historical juncture. Buffeted in recent years by rapid economic, social and political change yet still very much steeped in custom and history, the nation has become an amalgam of the traditional and the modern. As a result, the country has become increasingly difficult to categorize. How are we to represent today's Japan effectively and fairly predict its future? This critical multi-disciplinary collection explores the convergence of past and future in contemporary Japan. Contributors comment on a wide range of economic, socio-cultural and political trends such as the mobilization of Japanese labour, the burgeoning Ainu identity movement and the shifting place of the modern woman and conclude that despite the rapid changes many of the traditional facets of Japanese society have remained intact. Institutional change they assert is unlikely to occur quickly and Japan must find alternate ways to adjust to twenty-first century pressures of global competition and interdependence. A pleasure to read, this broad volume will be welcomed by upper level undergraduates, graduates and specialists in Japanese studies.

Prying Open the Door Takashi Oka, 1994 Oka explores the motivation that drives economic immigrants from Latin America, the Middle East and all parts of Asia to Japan. His anecdotes demonstrate the unique problems that each ethnic group has faced and the public debate that increasing social diversity demands.

Global Japan Roger Goodman, Ceri Peach, Ayumi Takenaka, Paul White, 2005-06-27 The Japanese have long regarded themselves as a homogenous nation, clearly separate from other nations. However, this long-standing view is being undermined by the present international reality of increased global population movement. This has resulted in the establishment both of significant Japanese communities outside Japan and of large non-Japanese minorities within Japan and has forced the Japanese to re-conceptualise their nationality in new and more flexible ways. This work provides a comprehensive overview of these issues and examines the context of immigration to and emigration from Japan. It

considers the development of important Japanese overseas communities in six major cities worldwide the experiences of immigrant communities in Japan as well as assessing the consequences for the Japanese people's view of themselves as a nation

Healthy Aging in Sociocultural Context Andrew E. Scharlach, Kazumi Hoshino, 2013 Healthy Aging in Sociocultural Context examines two emerging trends facing countries throughout the world population aging and population diversity It makes a unique contribution to our understanding of these timely issues by examining their implications for healthy aging a topic of increasing importance to policy makers planners researchers families and individuals of all ages The book focuses on three countries that provide important examples of these emerging global trends Japan Sweden and the United States Japan and Sweden are at the forefront in terms of healthy life expectancies while the United States represents a country with considerable diversity Examining these three countries together provides a unique opportunity to address questions such as the following How can we understand differences in healthy life expectancy among different countries What role might diversity play And how might these effects change as geographic mobility increases diversity even among societies that historically have been relatively homogeneous

Local Citizenship in Recent Countries of Immigration Takeyuki Tsuda, 2006-01-01 Since the late 1980s Japan has been experiencing significant levels of immigration primarily from Asian and Latin American countries due to severe domestic labor shortages Local Citizenship in Recent Countries of Immigration examines the various dimensions of local citizenship in Japan with comparative studies from South Korea Italy and Spain

Globalizing Chinese Migration Pál Nyíri, Igor Saveliev, 2018-12-20 This title was first published in 2003 Globalizing Chinese Migration is the first volume to deal comprehensively with the most recent wave of the migration from the People's Republic of China to Europe

and Asia By analyzing the Chinese state's role in this migration the authors dismiss as fiction the theory sometimes advanced by hostile and racist foreign observers that Chinese authorities are intent on using mass emigration as an expansionist tool They go on to explain that migrants who might in earlier times have been reviled as traitors and absconders are today more likely to be viewed by sections of the Chinese state bureaucracy as patriots who remain part of China's polity and economy and contribute to its standing overseas Some senior officials however particularly diplomats stress the harm done by new migrants both to China's economy which loses assets as a result of the migrants entrepreneurial activities and to its reputation in the world An essential resource for academics and students alike the volume presents important new data on aspects of Chinese migration largely neglected in the existing English language literature These include new forms of emigration from China by students and by workers from the country's north eastern provinces and emigration to destinations including Russia Southeast Asia and Japan normally unremarked by students of population movements **The**
