*Aphrodite's Kephali* Philip P. Betancourt, 2013-10-15 The small site of Aphrodite's Kephali among several other Minoan and later sites took advantage of the valley topography in the Isthmus of Ierapetra in eastern Crete by establishing themselves along the nearby hills resulting in easy access to the natural trade route between the Aegean and the Libyan Seas. A discussion of the architecture, artifacts, and ecofacts are presented from the excavation of this Early Minoan I watchtower. The conclusions challenge some of the commonly held views about Crete in the third millennium B.C. It is suggested that rather than being a precursor to a socially complex state that would arise later, early polities involving several communities probably already existed in the isthmus during the EM I period. Social and economic differentiation existed on a regional not just a local level and decisions for mutual defense could involve collaboration by groups of workers including the building of the watchtower that is the focus of this volume. **Philistor** Philip P. Betancourt, Eleni Mantzourani, 2012-09-30

Contributions by 37 scholars are brought together here to create a volume in honor of the long and fruitful career of Costis Davaras, former Ephor of Crete and Professor Emeritus of Minoan Archaeology at the University of Athens. Articles pertain to Bronze Age Crete and include mortuary studies, experimental archaeology, numerous artifactual studies, and discussions on the greater Minoan civilization. **New Directions and Paradigms for the Study of Greek Architecture**, 2019-11-26

*New Directions and Paradigms for the Study of Greek Architecture* comprises 20 chapters by nearly three dozen scholars who describe recent discoveries, new theoretical frameworks, and applications of cutting edge techniques in their architectural research. The contributions are united by several broad themes that represent the current directions of study in the field: i.e. the organization and techniques used by ancient Greek builders and designers; the use and life history of Greek monuments over time; the communication of ancient monuments with their intended audiences together with their reception by later viewers; the mining of large sets of architectural data for socio-economic inference; and the recreation and simulation of audio-visual experiences of ancient monuments and sites by means of digital technologies. **Time's Up! Murphy, 2011-06-15 Since the inception of Minoan archaeology, studies pertaining to tombs and tomb deposits have played seminal roles in our understanding of Minoan culture and the reconstruction of Bronze Age society. For several geographical

areas and chronological periods of Cretan history tombs are the most abundant source of data Each author in this volume takes a clear and distinct approach to the data including some that emphasize political geography on multi regional and multi scalar levels some that examine the commemoration of the dead and of the community for legitimizing purposes but also for maintaining and or creating elite positions in social systems and others that underline the overlap between mortuary rituals and religion The aim of this volume is not to present all tombs in all periods on Crete comprehensively but the breadth of these papers is intended generate a discourse not just among archaeologists working in different areas and time periods on Crete but also among archaeologists in Greece and a broader anthropological audience *Ancient Crete: Oxford*

look at the meanings behind key architectural designs of ancient Minoan culture Ever since Sir Arthur Evans first excavated at the site of the Palace at Knossos in the early twentieth century scholars and visitors have been drawn to the architecture of Bronze Age Crete Much of the attraction comes from the geographical and historical uniqueness of the island Equidistant from Europe the Middle East and Africa Minoan Crete is on the shifting conceptual border between East and West and chronologically suspended between history and prehistory In this culturally dynamic context architecture provided more than physical shelter it embodied meaning Architecture was a medium through which Minoans constructed their notions of social ethnic and historical identity the buildings tell us about how the Minoans saw themselves and how they wanted to be seen by others Architecture of Minoan Crete is the first comprehensive study of the entire range of Minoan architecture including houses palaces tombs and cities from 7000 BC to 1100 BC John C McEnroe synthesizes the vast literature on Minoan Crete with particular emphasis on the important discoveries of the past twenty years to provide an up to date account of Minoan architecture His accessible writing style skillful architectural drawings of houses and palaces site maps and color photographs make this book inviting for general readers and visitors to Crete as well as scholars Krinoi kai Limenes

**Popular Religion and Ritual in Prehistoric and Ancient Greece and the Eastern Mediterranean** Giorgos Vavouranakis, Konstantinos Kopanias, Chrysanthos Kanellopoulos, 2019-01-14 This volume features a group of select peer reviewed papers by an international group of authors both younger and senior academics and researchers on the frequently neglected popular cult and other ritual practices in prehistoric and ancient Greece and the eastern Mediterranean      **The Chrysokamino Metallurgy Workshop and Its Territory** Philip P. Betancourt, 2006 This detailed report describes archaeological fieldwork conducted between 1995 and 1997 in rural northeast Crete Excavations were made in two locations a metallurgy workshop abandoned in EM III and a nearby rural habitation site perhaps a farmhouse used until LM III An intensive survey of the vicinity revealed other activities in the area from the Early Neolithic onwards and placed the sites in a micro regional context A publication of the Minoan farmhouse will appear subsequently but this volume stands on its own as both an overview of the project and as a detailed study of the copper smelting workshop      **Reports on the Vrokastro**

**Area, Eastern Crete, Volume 3** University of Pennsylvania. Museum of Archaeology and Anthropology, Barbara J. Hayden, 2003 CD ROM for vol 2 includes Appendices 1 6 and the Vrokastro archaeological survey project      **Minoan Architecture and Urbanism** Quentin Letesson, Carl Knappett, 2017-07-04 Minoan Crete is rightly famous for its idiosyncratic architecture as well as its palaces and towns such as Knossos Malia Gournia and Palaikastro Indeed these are often described as the first urban settlements of Bronze Age Europe However we still know relatively little about the dynamics of these early urban centres How did they work What role did the palaces have in their towns and the towns in their landscapes It might seem that with such richly documented architectural remains these questions would have been answered long ago Yet analysis has mostly found itself confined to building materials and techniques basic formal descriptions and functional evaluations Critical evaluation of these data as constituting a dynamic built environment has thus been slow in coming This volume aims to provide a first step in this direction It brings together international scholars whose

research focuses on Minoan architecture and urbanism as well as on theory and methods in spatial analyses By combining methodological contributions with detailed case studies across the different scales of buildings settlements and regions the volume proposes a new analytical and interpretive framework for addressing the complex dynamics of the Minoan built environment
