and progress accelerated requiring strong support from the DfES and Ministers as well as action from those on the ground The Committee welcomes the Government's decision to accept the recommendations of the report by Sir Keith Ajegbo which highlighted the need for citizenship curriculum to have a closer focus on issues of identity diversity and belonging More can be done to disseminate between settings good practice information about approaches that are working in other institutions particularly in relation to whole school or college approaches that develop opportunities for active citizenship although it is essential that programmes are locally owned and relevant to the particular context The development of the workforce is also important to the success of citizenship education and although the expansion of the Continuing Professional Development CPD citizenship certificate programme is welcome more resources are needed to develop capacity in initial teacher training places for citizenship education

The Place of Ethics in Science

Education Amanda McCrory,Michael J. Reiss,2023-08-24 Science education particularly school science education has long had an uneasy relationship with ethics being unsure whether to embrace ethics or leave it to others In this book the authors

argue that while the methods of science and of ethics are very different ethics plays a key role in how science is undertaken and used And so ethics has a central place in science education whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet books magazines TV and radio or in places such as hospitals and zoos Written for science educators based in schools and elsewhere the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have Empowered with the knowledge shared in this book readers will feel confident about the place that ethics has in science education The authors provide a rich array of examples as to how science education both in school and out of school and for all ages can be enhanced through including teaching about ethics

The funding of science and discovery centres
